MINUTES OF THE MEETING  
OF  
LOUISIANA WILDLIFE AND FISHERIES COMMISSION

Thursday, June 3, 1993

Chairman Bert H. Jones presiding.

James H. Jenkins, Jr.  
Joseph B. Cormier  
Jeff Schneider  
Pete Vujnovich

Commissioners Tee John Mialjevich and Perry Gisclair were not in attendance.

Secretary Joe L. Herring was also present.

Chairman Jones called for a motion for approval of the **May 6, 1993, Commission Minutes**. A motion for approval was made by Commissioner Vujnovich and seconded by Commissioner Jenkins. The motion passed unanimously.

A motion for approval of the **May 18, 1993 Commission Minutes** was made by Commissioner Cormier and seconded by Commissioner Vujnovich. The motion passed unanimously.

The **April Aircraft Report** was presented by Mr. Lee Caubarreaux. This report showed four pilots flew a total of 95.2 hours for the month. He then gave a breakdown of the number of hours each plane was flown. Also included in the report was a breakdown of the flights that occurred during the month. Commissioner Jenkins asked about a flight in the Partenavia on April 26, 1993 which was for the quail federal project; where was the 210 permanently located, if flights on April 2, 12 and 13 originated from New Orleans, about the actual flights on April 2 and 22; and if there was any information on when the Commander would be available to fly. Chairman Jones asked about the status of the quail when they were found, about portions of Fort Polk being closed to hunting, and if hunters for quail would have to continue to go to Texas to hunt.

Chairman Jones called for Public Comments on the **1993-94 Resident Game Hunting Season Proposals** and discussion on Goose Creeping. First, he reminded everyone of the newly established hunting area, Area 7, and the fact that the dates have been changed from what was originally proposed. Chairman Jones then formally requested that the following dates for Area 7 be included in the hunting season packet: October 30 through November 14, 16 days still hunt only; November 20 through November 28, 9 days still hunt only; December 6 through December 10, 5 days still hunt only

(muzzleloader); December 11 through January 17, 38 days with or without dogs. A motion was made by Chairman Jones to accept the dates for Area 7 and to include them into the hunting packet that would be ratified at the July Commission Meeting. The motion was seconded by Commissioner Cormier and passed unanimously.

Chairman Jones asked the other Commission Members if they had comments on the Hunting Seasons and heard none. He then opened the discussion to the public.

Mr. Carl Gremillion made comments on the Goose Creeping law. He began by stating that Louisiana was the only state that has a law on goose creeping but felt the problem was basically under control. Mr. Gremillion stated the law was restricting the freedom of the honest sportsmen and then questioned whether the law was good. He requested the Commissioners review the information, decide and vote on repealing the ban on goose creeping. Commissioner Jenkins asked Mr. Gremillion if he felt it appropriate to have a rule on shooting geese on the ground. Commissioner Cormier asked what imposition this ban placed on hunters, and how many were killed legally. Chairman Jones expressed his appreciation to Mr. Gremillion for his comments.

Mr. Ken Tuminello also asked the Commission to repeal the goose creeping law. He stated no hunter condones wanton slaughter of animals and felt hunters wanted to practice good conservation measures. Mr. Tuminello also felt an effective program of promoting good sportsmanship through the media would be beneficial, such as the Poaching program, more enforcement techniques and an effective judicial response to violations. He again asked that the law be repealed, unethical abusers be punished and to allow the sportsmen take a few geese. Commissioner Schneider asked if it was possible to shoot into a flock of geese on the ground and not cripple or kill over the limit of birds and then asked if he would purposely flush the birds in order to shoot them.

Chairman Jones introduced Mr. Dave Hall, with the U.S. Fish and Wildlife Service. Mr. Hall gave a history of how the goose creeping issue came to be. The problem of people shooting into flocks of geese began in 1984, and for the next three years there was a task force that apprehended violators. During the 1985-86 season, there were 100 individuals apprehended; in 1986-87, there were 50 cases and in 1987-88 there were approximately 25 cases. He agreed with Mr. Tuminello about working with the courts, news media and sportsmen and stated this was being promoted. Since this practice has been in existence, there have not been any serious goose creeping cases made. Mr. Hall's biggest concern was making it clear they do not condone creeping into large flocks of birds and shooting them on the ground or in the air. He disagreed with the statement hunters can not kill geese using decoys and not being allowed to creep. At this point, he showed 3 slides which showed a great decrease in the number of violations associated with goose

hunting. Chairman Jones felt the most profound thing shown with the third slide was the turnaround on ethics made by Louisiana hunters. He also thought it unethical to shoot into a large flock of geese and questioned certain hunting tactics. The law on goose creeping should be more clearly defined, stated Chairman Jones. Commissioner Cormier asked, with the reduction shown, was the problem with the definition of the law? Then he stated a study into simplifying the law should be undertaken instead of reversing the law. Chairman Jones commented to Mr. Hall that he did present a positive message with the enforcement, education and biological research taking place.

While Mr. Hall was still at the podium, Commissioner Schneider asked what constituted baiting for ducks in normal agricultural practices and requested a meeting before the next season. Chairman Jones agreed with Commissioner Schneider that this was another area that was confusing as to what is and what is not okay in maintaining good duck habitat.

Mr. Bill Ferguson, a Special Agent from the Fish and Wildlife Service from Lake Charles, stated there was a meeting held each year before hunting season to discuss baiting policies, procedures, and current case law. The prosecution of cases has been a great factor in educating the public on goose creeping. The videos and presentations by Mr. Hall were never done to hurt any hunters but were to prove the agents worthiness in their jobs. As he recalled, Mr. Ferguson stated the problem began in 1977 and got worse as time went on and there was a lack of enforcement personnel in the area. In 1985 and 1986, the Fish and Wildlife Service decided they needed help from the outside. By the third year of the crackdown on goose creeping, the Department's Enforcement Agents became involved. Then the suggestion for a regulation was made and hours were spent in developing the regulation, but now there is a problem of ethics and prosecution.

Mr. David Boudreaux, representing Acadiana Sportsmen League, stated his league was one of the original groups involved in getting the goose creeping ban. At that time Mr. Boudreaux felt the regulation was the best thing, but was now aware of the problems associated with it. He also made it known this regulation was not to penalize any one particular group or individual. He then made reference to a packet which showed background information, the problem and some recommendations in retaining the regulation. He continued by stating his concern was in shooting into a flock of geese, these birds relocating, and in the future, there would be more properties leased to hunting clubs and less land for the birds to use as a safe haven. Mr. Boudreaux stated he has talked to commercial hunting clubs, private hunting clubs, and individual goose hunters and they are in support of the regulation. He hoped the Commission would consider fine tuning the regulation and suggested the enforcement agents get together on how they will and will not enforce the regulation. He felt if goose creeping was

allowed again, it would be the death of goose hunting. A discussion on duck and goose populations was also given by Mr. Boudreaux. Secretary Herring asked if the ban on goose creeping was a law or statute.

Mr. Wilson "Tibby" Thibodaux, a waterfowl hunter for 58 years, reminded the Commission that while he was President of the Louisiana Wildlife Federation they were in favor of the ban on goose creeping. But he noted a need to identify the creeping regulation as well as the baiting law and offered his assistance if needed. Then Mr. Thibodaux described a situation about flushing a flock of geese and asked if it was illegal.

Mr. John Craft, Pontchatoula, Louisiana, stated Area 6 and the Joyce WMA were too liberal in the number of doe days and suggested cutting those days to allow for more youth hunts. He also agreed with the concept of Hunters Against Poachers (HAP) and requested additional days for Areas 6 and 1.

**The Final Ratification of Black Bass Regulations for Toledo Bend - Caddo Lake** was introduced by Mr. Bennie Fontenot. The rule would not change the bass regulations on Toledo Bend, it just pulled Caddo Lake out and gave them a separate regulation. The regulation for Caddo Lake included a 14 to 17 inch slot limit, 10 fish bag limit and no more than 4 fish over 17 inches. Studies conducted by the Inland Fisheries Division have shown that Caddo Lake produced numerous bass under 14 inches and the use of a slot limit should prove to be a corrective measure. The fishermen and marina operators in the area are in agreement with the proposed regulations. Texas will also implement a slot limit in September, but not the same as Louisiana's regulations. Commissioner Jenkins asked what was the daily bag limit for Texas, what Mr. Fontenot did not understand about the Texas regulations, and what was the regulation on Caddo Lake now? Chairman Jones asked about the minimum size regulation versus the slot limit. Commissioner Jenkins stated, if all the small fish are caught, then they would not reach the slot limit. Commissioner Schneider asked Mr. Fontenot if he anticipated the regulation changing after the next four or five years if the regulation worked. Commissioner Jenkins suggested putting a sunset provision on the regulation so it would be looked at again to make sure the regulation was working. He then stated a concern about what the regulation was now and what it would be changed to and the need for the regulation to be reviewed in a reasonable length of time. Commissioner Schneider asked why the fish were not getting to the 14 inch minimum size, and if there were too many fish and not enough food base or shad in the lake. Chairman Jones called for a vote for both the Toledo Bend and Caddo Lake regulations. A motion was made to accept the regulations by Commissioner Schneider and was seconded by Commissioner Cormier. The motion passed with no opposition.

(The full text of the Rule is  
made a part of the record.)

RULE

Department of Wildlife and Fisheries  
Wildlife and Fisheries Commission

The Louisiana Wildlife and Fisheries Commission does hereby  
amend the joint Louisiana/Texas Toledo Bend and Caddo Lake  
Sportfishing Reciprocal Agreement.

Title 76

Wildlife and Fisheries

Part VII. Fish and Other Aquatic Life

Chapter 1. Freshwater Sport and Commercial Fishing

Section 110. Toledo Bend Reciprocal Agreement

The daily creel limit, (daily take), for black bass  
(Micropterus spp.) is set at eight fish and the minimum total  
length is set at 14 inches in Toledo Bend Reservoir. The  
possession limit shall be the same as the daily take on water and  
twice the daily take off water.

AUTHORITY NOTE: Promulgated in accordance with R.S. 56:6  
(25)(a), 325(c), 326.3, 673.

HISTORICAL NOTE: Promulgated by the Department of Wildlife  
and Fisheries, Wildlife and Fisheries Commission LR 14:548 (August  
1988), Amended LR 17:278 (March 1991), Amended LR 17:1123 (November  
1991), Amended LR 19: (June 1993).

Bert H. Jones  
Chairman

RULE

Department of Wildlife and Fisheries  
Wildlife and Fisheries Commission

The Louisiana Wildlife and Fisheries Commission hereby adopts  
the following rule on black bass (Micropterus spp.) in Caddo Lake  
located in Caddo Parish, Louisiana.

Title 76

Wildlife and Fisheries

Part VII. Fish and Other Aquatic Life

Chapter 1. Freshwater Sport and Commercial Fishing

Section 167. Black Bass Regulations, Caddo Lake

Harvest regulations for black bass (Micropterus spp.) on Caddo Lake located in Caddo Parish, Louisiana are as follows:

Size limit: 14 inch-17 inch slot

Daily take: 10 fish of which no more than 4 fish may exceed 17 inches maximum total length.

Possession limit: On Water - Same as daily take.  
Off Water - Twice the daily take.

A 14-17 inch slot limit means that it is illegal to keep or possess a black bass whose maximum total length is between 14 inches and 17 inches, both measurements inclusive.

AUTHORITY NOTE: Promulgated in accordance with R.S. 56:6 (25)(a), 325 (C), 326.3.

HISTORICAL NOTE: Promulgated by the Department of Wildlife and Fisheries, Wildlife and Fisheries Commission, L.R. 19: (June 1993).

Bert H. Jones  
Chairman

A Review of the Method for Setting Shrimp Season was an agenda item requested by Commissioner Jenkins. He explained he was confused about the procedure followed this year in the setting of the shrimp season and the deviations that occurred. Commissioner Jenkins outlined to Secretary Herring five areas of concern he wanted answered. The first area of concern was "the criteria for the opening dates and the history of development of this criteria". Mr. Corky Perret felt the Commission did not deviate much in setting the shrimp season this year. He began the discussion by stating fishermen used to talk about the way they would fish the first of April. Historically, when the topic of shrimp was discussed, the shrimp being referred to was the white shrimp and from then until now, the white shrimp was probably the best tasting shrimp. The fishing during the early parts of April was to catch the overwintering of white shrimp that were in inshore waters. Then Mr. Perret read the following statement from a report prepared for the Commission by the Marine Fisheries Division: "Prior to the enactment of the present program, unrestrained fishing effort during late April and early May of the late 50's in quest of the spring white shrimp found in the inland waters destroyed the

juvenile brown population in its infancy". During the 60's, the industry, legislature and department established a May opening date because of those findings in order to have brown shrimp production. However, there have been situations in the past where white shrimp were taken that did not jeopardize the brown shrimp season. Commissioner Jenkins asked what was the criteria for opening shrimp season. Mr. Perret advised it was when the majority of the shrimp are 100 count and larger. Going on, Commissioner Jenkins asked how did this come about, had it ever been changed and who has the authority to change it. Mr. Perret stated the 100 count was only a benchmark the Department shoots for. Chairman Jones asked if it was a statute or law and Mr. Perret stated it was neither.

Commissioner Jenkins then asked what criteria the other states use in setting their shrimp seasons. Mr. Perret reported Florida opened their season using different regions, Alabama and Mississippi used a 68 count and Texas opened their season by law on May 15 and closed July 15 in inshore waters. Also in Texas, there was a year round bait shrimp fishery, which is the catching of "x" number of pounds per day of live shrimp with no penalty for dead shrimp. Going on, Commissioner Jenkins asked how does Texas' inshore fishery compare to Louisiana, and, between the two states, do they produce the majority of shrimp from the Gulf of Mexico. Louisiana produced over 20 million pounds of brown shrimp whereas Texas produced between 12 and 15 million pounds.

The third area of concern for Commissioner Jenkins was the cost of collecting the data. Mr. Perret explained the breakdown of expenditures chart contained in the report with a total figure for the spring season of \$163,415. Commissioner Jenkins asked why were the other samples taken and what was done with the information obtained.

The fourth question from Commissioner Jenkins was, "has the Department ever explored alternate methods in Louisiana for opening the shrimp season". Mr. Perret answered yes. He further explained that now there are three zones for the brown shrimp season and white shrimp and that sometimes it was just as difficult to close a season as to open it. And then you have offshore waters. So, with all these different zones, the job was a lot more involved and Mr. Perret felt this was the route that should be taken. Commissioner Jenkins complained that, with all of the time, effort and money spent to gather the data, they then receive information from the Legislature or the public to change the dates and not use the biologists' data to make their decision. Mr. Perret reminded the Commission that the group that made the most noise about the opening dates was not well represented at the first meeting and also the Commission has not always followed the staff's recommendations in setting season dates. Commissioner Jenkins noted those changes did not affect livelihoods or commercial businesses, and in the last three or four years, he has felt the thing to do was follow the Department's recommendations. Then

Commissioner Jenkins asked Mr. Perret, if he had to make a recommendation at the last hour, would he have changed the opening date.

Commissioner Cormier stated he was one of the Commission members who changed the opening date because the data proved there would not be a permanent impact to the resource, and that three or four days were added to Zone 2 by opening it earlier. He understood what Commissioner Jenkins stated about the legislature, but he made it clear that he listened to what the Department recommended and what the public wanted. Mr. Perret noted that Commissioner Cormier asked if there would be any long term detrimental effect and he answered no, that shrimp are a one year crop.

Commissioner Schneider stated that, with Texas catching half as much shrimp as Louisiana and getting more money for their shrimp and the Commission being pressured to open the season when the shrimp are small, it may not be a biological detriment but felt it hurt the fishermen's pocketbook.

Commissioner Jenkins reminded Mr. Perret that when 50% of the shrimp are 100 count, there are 50% that are smaller than 100 count also. The last question Commissioner Jenkins had was about HCR 252 and SCR 155 and what effect should a Concurrent Resolution have on the action of the Commission. Mr. Don Puckett expressed his opinion that the Resolutions were not binding on the Commission. They were just expressing the wishes of the Legislature.

Mr. Brandt Savoie gave a report on the season thus far. He stated there were not as many boats fishing as in past years, catches were not very good and the shrimp were small. The area from Lake Judge Perez south to Venice produced the most shrimp. Most of the recreational shrimpers had caught their limit by 10:00 a.m. and the commercial shrimpers reported good catches. The size of the shrimp ranged from 60-70's to over 100 count with an average of 80-100's. Prices started with fifty cents for 100 count plus. 80-100 count got seventy cents, and 70-80 count got eighty cents per pound.

Grand Isle and Barataria Bay reported very poor catches of small shrimp. The sizes ranged from 60-70's up to 100-120 count and over and the average was 80-100. The prices were about ten cents more a pound than in the Venice area.

The Bayou Lafourche area west to Cocodrie reported good catches in the upper areas of the marsh and not good in the lower areas. The sizes also ranged from 60-70's up to 100-120 count and the average was in the 80-100 count range. A large number of fish and an excessive amount of debris from Hurricane Andrew were reported in the area, which made culling difficult.

The last area, from Cocodrie to the Atchafalaya River, did not have as many shrimp as the other areas did. The average size of shrimp landed were 80-100 count, but a lot of 100 plus count were caught and discarded.

The overall picture was as expected, but there were a few more shrimp closer to the Mississippi River and shrimp sizes were small and averaged 80-100 after culling. Commissioner Jenkins stated that a lot of small shrimp were killed besides the small shrimp that were kept. He then asked, based on the prices that were paid, how would 31-35 count shrimp affect the price per pound; how long does it take for a shrimp to go from 80-100 count to a 31-35 count; how many days can you actually fish for brown shrimp in Zone 2; and, if the season had been delayed two more weeks, would it have been more economical for the shrimpers. Commissioner Jenkins asked if an economic model on the projected openings could be developed with the historical data already available. Chairman Jones thought the model would be very interesting. Commissioner Jenkins wondered if the Department thought it would be a good idea to attempt this job.

Commissioner Vujnovich stated he was told that ten days before the season opened, there was an abundance of shrimp along the beach and asked if this was true, and how was the production in the St. Mary area. He then explained the reason for asking was because a freshwater diversion was pumping river water into the area.

Mr. Savoie told the Commission that, when he contacted both Mississippi and Alabama, they could not predict when to open the shrimp season this year because they were not seeing enough shrimp to make a prediction. Chairman Jones asked, why does Mississippi use the 68 count, and why does Louisiana use the 100 count, and then noted a large discrepancy between Mississippi and Alabama in association with Louisiana. Mr. Roussel read a paragraph on page 2 of the report as to why the 100 count was selected.

Commissioner Schneider asked Mr. Perret if the fleet has changed over time; since technology has changed, can not the small boat fleet go after the shrimp now; has the industry adapted to the change also; and was the economic pressure causing the size of the shrimp to be reduced.

Mr. Savoie gave a report on Zones 1 and 3. He reported Zone 3 was seeing a few more shrimp but the size was still small. Zone 1 was seeing quite a few more shrimp with at least 3 populations showing up. In Zone 1, there would probably be a little larger size shrimp by opening date than what was in Zone 2. Mr. Perret invited the Commission Members to go with the staff next spring on some of the trips to monitor the shrimp situation.

Commissioner Jenkins thanked Mr. Perret and his staff for the report and Commissioner Schneider agreed. Then Commissioner

Jenkins made a motion to adopt a resolution. The motion read as follows: "I move that the Marine Division or the appropriate division in the Department, in cooperation with the Finance Division, create an economic model to show from our historical catch and price data, the net income to the shrimp industry of taking shrimp at different sizes". The motion was seconded by Commissioner Cormier. The motion passed unanimously.

After returning from lunch, the Commissioners were given a packet of information on legislative activities and took time to review it.

A Report on the Status/Activity of the Department's Finance Committee was given by Mr. Fred Prejean. He presented the Commission with factual matters that came from the two Finance Meetings held thus far, copies of the minutes from the meetings, other data on generating revenue and the public's response to funding mechanisms. The creation of the Committee was to satisfy the Department's present funding needs and those for long range purposes. The Committee also needed to determine what size pie was needed before determining how to divide it. The Committee was also prepared to utilize the wisdom of the staff and public while looking at the cost benefit relationship of each program. The source, allocation and application of revenue in support of each program and the benefits of the program would be looked at and this would allow the public to see where each dollar comes from, and where it was spent and to decide what should be the final goal. Public involvement, such as briefing on the current status of the Department, and a forum to receive input would be created. A tool was being developed to evaluate and prioritize all the Department's programs. Each division was prepared to identify all programs that are statutorily mandated, those programs that were active and those not active, and those programs inactive but currently mandated. The notion the Department was just sitting back while the money was being taken away from us was not true. The Department has been working for several months on some funding mechanisms. The perception has been the absence of revenue has caused most of the problems that the Department has encountered during the legislative session, but also there have been management problems. The task of the Finance Committee was to find monies to finance the different programs. Mr. Prejean concluded by advising the next Finance Committee meeting would be held on June 16, 1993 at 10:00 a.m. in the Baton Rouge Office.

Commissioner Jenkins asked Mr. Prejean to send out a reminder notice in advance. Going on, Commissioner Jenkins asked Mr. Prejean if he felt there would be a problem or lack of capability in constructing an economic model on the shrimp business. Commissioner Schneider asked if the funding mechanism chart was correlated with the management pilot survey results. Commissioner Jenkins, on behalf of the Commission, complimented Mr. Prejean on the job performed.

**Civil Restitution and Class 1 Update** computer printouts were provided by Ms. Wynnette Kees to the Commission members. She stated to Chairman Jones a copy of the opinion issued by the Hearing Officer on the Winn Parish case had been received and the defendant does owe for Civil Restitution. Commissioner Jenkins inquired on two columns on the printouts, "Amount Paid" and "Discounts Taken", and was the "Amount Paid" a net amount. Chairman Jones commented the cost of being an outlaw was going up and hoped being an outlaw would become non-existent. Ms. Kees reported it was beginning to work better.

Chairman Jones asked Ms. Kees to introduce the Attorney who would present the **Collection Attorney's Report**. Mr. Brian Babin stated he dealt with 300 files that were generally dated two plus years. An effort to send personal collection letters to the 300 violators resulted with about 15% being returned by mail. The recoveries to date amounted to \$5,697 out of approximately 250 people the letters have reached with a net proceed of \$4273 to the Department. Mr. Babin stated he does receive input from Assistant District Attorney's and passes this information along to the Department's Legal staff. He then explained how the new system for handling citations would work. Chairman Jones asked Mr. Babin if the people he contacted were getting the message that being an outlaw does not pay. Commissioner Schneider asked if the old cases would be lost because of the statute of limitations. Chairman Jones stated he hoped it was working.

The **Monthly Law Enforcement Report for May** was given by Col. Winton Vidrine. He began by thanking Mr. Dave Hall, Mr. Bill Ferguson and Mr. David Boudreaux for the comments made toward the Enforcement Officers. He also stated he encouraged his agents to work with the Federal agents and if a problem should arise, to help out if necessary. An annual meeting in August or September was held to discuss the new Federal regulations.

Col. Vidrine felt the goose creeping regulation should be done away with and an attempt made to try to get another regulation that would be prosecutable.

The following numbers of citations were issued during the month of May.

Region I - Minden - 120 citations.

Region II - Monroe - 197 citations.

Region III - Alexandria - 223 citations.

Region IV - Ferriday - 97 citations.

Region V - Lake Charles - 165 citations.

Region VI - Opelousas - 241 citations.

Region VII - Baton Rouge - 260 citations.

Region VIII - New Orleans - 240 citations. Commissioner Jenkins asked about a citation for blocking the passage of fish, and was there a requirement on the number of openings for a certain size net.

Region IX - Thibodaux - 379 citations.

Oyster Strike Force - 53 citations.

Statewide Strike Force - 203 citations. Commissioner Jenkins asked what happened to the marijuana that was seized. Col. Vidrine commented the Enforcement plane usually worked where the Statewide Strike Force was working. However, one of the pontoons developed a leak and assistance received from Chief Pilot Gene Rackle was very much appreciated. Since the Statewide Strike Force is in existence, there are personnel in the Grand Isle area all the time now and the housing of the agents is with the cooperation of the Marine Fisheries Division acknowledged, Col. Vidrine.

Offshore Boats - 44 citations.

The grand total of citations issued statewide for the month of May was 1,965.

An investigation was being conducted on two enforcement agents the Commission members had received correspondence on, advised Col. Vidrine.

Commissioner Schneider thanked Major Whitehead for the good job the Statewide Strike Force was doing.

The District Attorney's Report was given by Col. Winton Vidrine. The Computer Section put the two reports together, which included a parish summary and a detailed summary by parish by code of each violation. Commissioner Jenkins stated the idea of the report was to get the cooperation of the Attorney's so the tracking of the tickets issued could be followed. But the report presented at the meeting showed more than 50% of the District Attorney's were not doing anything and he asked if the Department was receiving less cooperation or why there was not much reaction, and if there was one employee in the Department to communicate with the District Attorney's. Commissioner Jenkins then requested the item be placed on the agenda for the next meeting to answer why the cooperation was not occurring and how the program could be rejuvenated. Also, Commissioner Jenkins asked what was the difference between "no action" and "not pros", would the effect be the same, and was there a statute of limitations for "no action" violations.

The Secretary's Report to the Commission was the next item given by Secretary Herring. There were educational activities during the month which included people from the State of Missouri picking up species along the Gulf coast and participating in classes at the Marine Lab.

Renovations to the bottom floor of the dormitory facility and the holding ponds at the Marine Lab continued from money received because of Hurricane Andrew. Mr. Phil Bowman, of the Marine Fisheries Division, has been working with other agencies and the Corps of Engineers on the Bonnet Carre Spillway Freshwater Diversion.

Two employees from the Department have met with the Oil Spill Drill Team and are preparing to participate in an exercise later on during July.

The Inland Fisheries Division is working with Dow Chemical Company and removed another 300,000 bass and put them into the Atchafalaya River. Also stocked into the Atchafalaya were 400,000 Florida bass from Texas, and 300,000 largemouth bass from Georgia. A statewide stocking of 1,424,000 bass has also occurred. Toledo Bend and Indian Creek Reservoir received a total of 42,463 striped bass.

A total of 2,516 acres of vegetation was sprayed by the Water Hyacinth Section during the month.

The Education Section has participated in 15 fishing clinics with about 8,000 students. There were hunter education clinics, 2 bow hunter clinics with 78 students, 5 Project Wild workshops with 90 participants, and 3 boating safety clinics with only 30 participants. Other divisions in the Department, along with other agencies, would be helping the Education Section with the National Safe Boating Week and National Fishing Week.

Secretary Herring then asked Mr. Harry Blanchet to give a report on the Menhaden Fish Kill and Mr. Pete Juneau to report on the Ridley's Sea Turtle die-offs. Mr. Blanchet explained two menhaden vessels working near Empire had an accidental release of the Atlantic Thread Herring and some Menhaden. Because of the composition of the thread herring, the fish floated onto Grand Isle instead of decomposing. Then he gave background information on the Atlantic thread herring. Chairman Jones asked, why did the fish concentrate in one area in Florida?

Mr. Pete Juneau advised approximately 35 dead sea turtles had washed onto Grand Isle beach and the City of Grand Isle buried them immediately. A total of dead sea turtles, as of the meeting date, was approximately 80. The National Marine Fisheries Service had been contacted, a person came and identified the turtle, and tried to determine what caused the kill. An employee of the Aquarium of

the Americas took some of the specimens and performed necropsies on the turtles. The staff was still waiting to hear results of the tests and was still working with the National Marine Fisheries Service. Commissioner Jenkins asked if the City of Grand Isle knew what species the turtles were when they buried them, and did they know they were Endangered Species turtles. The Coast Guard sent a helicopter to survey the area and the other district offices were notified to report any sightings.

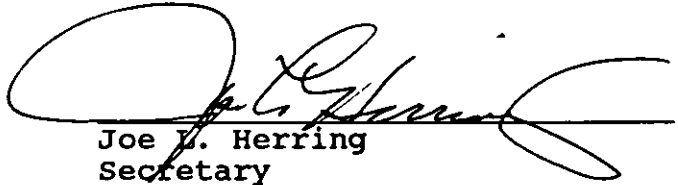

Secretary Herring thanked Mr. Dave Hall and Mr. Bill Ferguson from the Fish and Wildlife Service for attending the meeting.

A motion to set the **September 1993 Meeting Date** for September 2, 1993 in the Baton Rouge office, beginning at 10:00 a.m. was made by Commissioner Vujnovich and seconded by Commissioner Schneider. The motion passed unanimously.

Commissioner Jenkins asked to consider holding the August Commission Meeting in Grand Isle. This suggestion was well received except it was noted the waterfowl season dates would be set at that meeting.

Chairman Jones called for **Public Comments** and received none.

Commissioner Jenkins made a motion to **Adjourn** the meeting and was seconded by Commissioner Schneider.

Joe L. Herring  
Secretary

JLH:sch

MINUTES OF THE MEETING

OF

LOUISIANA WILDLIFE AND FISHERIES COMMISSION

Thursday, June 3, 1993

Chairman Bert H. Jones presiding.

James H. Jenkins, Jr.  
Joseph B. Cormier  
Jeff Schneider  
Pete Vujnovich

Commissioners Tee John Mialjevich and Perry Gisclair were not in attendance.

Secretary Joe L. Herring was also present.

Chairman Jones called for a motion for approval of the **May 6, 1993, Commission Minutes**. A motion for approval was made by Commissioner Vujnovich and seconded by Commissioner Jenkins. The motion passed unanimously.

A motion for approval of the **May 18, 1993 Commission Minutes** was made by Commissioner Cormier and seconded by Commissioner Vujnovich. The motion passed unanimously.

The **April Aircraft Report** was presented by Mr. Lee Caubarreaux. This report showed four pilots flew a total of 95.2 hours for the month. He then gave a breakdown of the number of hours each plane was flown. Also included in the report was a breakdown of the flights that occurred during the month. Commissioner Jenkins asked about a flight in the Partenavia on April 26, 1993 which was for the quail federal project; where was the 210 permanently located, if flights on April 2, 12 and 13 originated from New Orleans, about the actual flights on April 2 and 22; and if there was any information on when the Commander would be available to fly. Chairman Jones asked ~~how were~~ the quail when they were found, about portions of Fort Polk being closed to hunting, and if hunters for quail would have to continue to go to Texas to hunt.

Chairman Jones called for Public Comments on the **1993-94 Resident Game Hunting Season Proposals** and discussion on Goose Creeping. First, he reminded everyone of the newly established hunting area, Area 7, and the fact that the dates have been changed from what was originally proposed. Chairman Jones then formally requested that the following dates for Area 7 be included in the hunting season packet: October 30 through November 14, 16 days still hunt only; November 20 through November 28, 9 days still hunt only; December 6 through December 10, 5 days still hunt only

*Draft*  
*Corrections made*  
*6/14/93 - sch*

*About the status of*

(muzzleloader); December 11 through January 17, 38 days with or without dogs. A motion was made by Chairman Jones to accept the dates for Area 7 and to include them into the hunting packet that would be ratified at the July Commission Meeting. The motion was seconded by Commissioner Cormier and passed unanimously.

Chairman Jones asked the other Commission Members if they had comments on the Hunting Seasons and heard none. He then opened the discussion to the public.

Mr. Carl Gremillion made comments on the Goose Creeping law. He began by stating that Louisiana was the only state that has a law on goose creeping but felt the problem was basically under control. Mr. Gremillion stated the law was restricting the freedom of the honest sportsmen and then questioned whether the law was good. He requested the Commissioners review the information, decide and vote on repealing the ban on goose creeping. Commissioner Jenkins asked Mr. Gremillion if he felt it appropriate to have a rule on shooting geese on the ground. Commissioner Cormier asked what imposition this ban placed on hunters, and how many were killed legally. Chairman Jones expressed his appreciation to Mr. Gremillion for his comments.

Mr. Ken Tuminello also asked the Commission to <sup>Repeal</sup> overturn the goose creeping law. He stated no hunter condones wanton slaughter of animals and felt hunters wanted to practice good conservation measures. Mr. Tuminello also felt an effective program of promoting good sportsmanship through the media would be beneficial such as the Poaching program, more enforcement techniques and an effective judicial response to ~~those with~~ violations. He again asked that the law be repealed, unethical abusers be punished and to allow the sportsmen take a few geese. Commissioner Schneider asked if it was possible to shoot into a flock of geese on the ground and not cripple or kill over the limit of birds and then asked if he would purposely flush the birds in order to shoot them. <sup>U.S.</sup>

Chairman Jones introduced Mr. Dave Hall, with the Fish and Wildlife Service. Mr. Hall gave a history of how the goose creeping issue came to be. The problem of people shooting into flocks of geese began in 1984, and for the next three years there was a task force that apprehended violators. During the 1985-86 season, there were 100 individuals apprehended; in 1986-87, there were 50 cases and in 1987-88 there were approximately 25 cases. He agreed with Mr. Tuminello about working with the courts, news media and sportsmen and stated this was being practiced. Since this practice has been in existence, there ~~has~~ not been any serious goose creeping cases made. Mr. Hall's biggest concern was making it clear they do not condone creeping into large flocks of birds and shooting them on the ground or in the air. He disagreed with the statement hunters can not kill geese using decoys and not being allowed to creep. At this point, he showed 3 slides which showed a great decrease in the number of violations associated with goose

<sup>Promoted</sup>  
<sup>have</sup>

hunting. Chairman Jones felt the most profound thing shown <sup>WAS</sup> with the third slide was the turnaround on ethics made by Louisiana hunters. He also thought it unethical to shoot into a large flock of geese and questioned certain hunting tactics. The law on goose creeping should be more clearly defined, stated Chairman Jones. Commissioner Cormier asked, with the reduction shown, was the problem with the definition of the law? Then he stated a study into simplifying the law should be undertaken instead of reversing the law. Chairman Jones commented to Mr. Hall that he did present a positive message with the enforcement, education and ~~the~~ biological research taking place.

While Mr. Hall was still at the podium, Commissioner Schneider asked what constituted baiting for ducks in normal agricultural practices and requested a meeting before the next season. Chairman Jones agreed with Commissioner Schneider that this was another area that was confusing as to what is and what is not okay in maintaining good duck habitat.

Mr. Bill Ferguson, a Special Agent from the Fish and Wildlife Service from Lake Charles, stated there was a meeting held each year before hunting season to discuss baiting policies, procedures, and ~~also~~ current case law. The prosecution of cases has been a great factor in educating the public on goose creeping. ~~The videos~~ <sup>WERE</sup> and presentations by Mr. Hall ~~was~~ <sup>WERE</sup> never done to hurt any hunters but ~~was~~ <sup>WERE</sup> to prove the agents worthiness in their jobs. As he recalled, Mr. Ferguson stated the problem began in 1977 and got worse as time went on and there was a lack of enforcement personnel in the area. In 1985 and 1986, the Fish and Wildlife Service decided they needed help from the outside. By the third year of the crackdown on goose creeping, the Department's Enforcement Agents became involved. Then the suggestion for a regulation was made and hours were spent in developing the regulation, but now there is a problem of ethics and prosecution.

Mr. David Boudreaux, representing Acadiana Sportsmen League, stated his league was one of the original groups involved in getting the goose creeping ban. At that time Mr. Boudreaux felt the regulation was the best thing, but was now aware of the problems associated with it. He also made it known this regulation was not to penalize any one particular group or individual. He then made reference to a packet which showed background information, the problem and some recommendations in retaining the regulation. He continued by stating his concern was in shooting into a flock of geese, these birds relocating and in the future, there would be more properties leased to hunting clubs and less land for the birds to use as a safe haven. Mr. Boudreaux stated he has talked to commercial hunting clubs, private hunting clubs, <sup>AND</sup> individual goose hunters and they are in support of the regulation. He hoped the Commission would consider fine tuning the regulation and ~~for~~ <sup>suggested</sup> the enforcement agents get together on how they will and will not enforce the regulation. He felt if goose creeping was allowed

again, it would be the death of goose hunting. A discussion on duck and goose populations was also given by Mr. Boudreaux. Secretary Herring asked if the ban on goose creeping was a law or statute.

Mr. Wilson "Tibby" Thibodaux, a waterfowl hunter for 58 years, reminded the Commission that while he was President of the Louisiana Wildlife Federation they were in favor of the ban on goose creeping. But he noted a need to identify the creeping regulation as well as the baiting law and offered his assistance if needed. Then Mr. Thibodaux described a situation about flushing a flock of geese and asked if it was illegal.

*were* Mr. John Craft, Pontchatoula, Louisiana, stated Area 6 and the Joyce WMA *was* too liberal in the number of doe days and suggested cutting those days to allow for more youth hunts. He also agreed with HAP and requested additional days for Areas 6 and 1.

*? what's HAP* The Final Ratification of Black Bass Regulations for Toledo Bend - Caddo Lake was introduced by Mr. Bennie Fontenot. The rule would not change the bass regulations on Toledo Bend, it just pulled Caddo Lake out and gave them a separate regulation. The regulation for Caddo Lake included a 14 to 17 inch slot limit, 10 fish bag limit and no more than 4 fish over 17 inches. *have shown that Caddo Lake* Studies conducted by the Inland Fisheries Division ~~has~~ produced numerous bass under 14 inches and the use of a slot limit should prove to be a corrective measure. The fishermen and marina operators in the area are in agreement with the proposed regulations. *changed* Texas will also implement a slot limit in September, but ~~are~~ not the same as Louisiana's regulations. Commissioner Jenkins asked what was the daily bag limit for Texas, what Mr. Fontenot did not understand about the Texas regulations, and what was the regulation on Caddo Lake now? Chairman Jones asked about the minimum size regulation versus the slot limit. Commissioner Jenkins stated, if all the small fish are caught, then they would not reach the slot limit. Commissioner Schneider asked Mr. Fontenot if he anticipated the regulation changing after the next four or five years if the regulation worked. Commissioner Jenkins suggested putting a sunset provision on the regulation so it would be looked at again to make sure the regulation was working. He then stated a concern about *to* ~~what the regulation was now and what it would be going to and the need for the regulation~~ be reviewed in a reasonable length of time. Commissioner Schneider asked why the fish were not getting to the 14 inch minimum size, and if there were too many fish and not enough food base or shad in the lake. Chairman Jones called for a vote for both the Toledo Bend and Caddo Lake regulations. A motion was made to accept the regulations by Commissioner Schneider and was seconded by Commissioner Cormier. The motion passed with no opposition.

(The full text of the Rule is made a part of the record.)

RULE

Department of Wildlife and Fisheries  
Wildlife and Fisheries Commission

The Louisiana Wildlife and Fisheries Commission does hereby amend the joint Louisiana/Texas Toledo Bend and Caddo Lake Sportfishing Reciprocal Agreement.

Title 76

Wildlife and Fisheries

Part VII. Fish and Other Aquatic Life

Chapter 1. Freshwater Sport and Commercial Fishing

Section 110. Toledo Bend Reciprocal Agreement

The daily creel limit, (daily take), for black bass (Micropterus spp.) is set at eight fish and the minimum total length is set at 14 inches in Toledo Bend Reservoir. The possession limit shall be the same as the daily take on water and twice the daily take off water.

AUTHORITY NOTE: Promulgated in accordance with R.S. 56:6 (25)(a), 325(c), 326.3, 673.

HISTORICAL NOTE: Promulgated by the Department of Wildlife and Fisheries, Wildlife and Fisheries Commission LR 14:548 (August 1988), Amended LR 17:278 (March 1991), Amended LR 17:1123 (November 1991), Amended LR 19: (June 1993).

Bert H. Jones  
Chairman

RULE

Department of Wildlife and Fisheries  
Wildlife and Fisheries Commission

The Louisiana Wildlife and Fisheries Commission hereby adopts the following rule on black bass (Micropterus spp.) in Caddo Lake located in Caddo Parish, Louisiana.

Title 76

Wildlife and Fisheries

Part VII. Fish and Other Aquatic Life

Chapter 1. Freshwater Sport and Commercial Fishing

Section 167. Black Bass Regulations, Caddo Lake

Harvest regulations for black bass (Micropterus spp.) on Caddo Lake located in Caddo Parish, Louisiana are as follows:

Size limit:	14 inch-17 inch slot
Daily take:	10 fish of which no more than 4 fish may exceed 17 inches maximum total length.
Possession limit:	On Water - Same as daily take. Off Water - Twice the daily take.

A 14-17 inch slot limit means that it is illegal to keep or possess a black bass whose maximum total length is between 14 inches and 17 inches, both measurements inclusive.

AUTHORITY NOTE: Promulgated in accordance with R.S. 56:6 (25)(a), 325 (C), 326.3.

HISTORICAL NOTE: Promulgated by the Department of Wildlife and Fisheries, Wildlife and Fisheries Commission, L.R. 19: (June 1993).

Bert H. Jones  
Chairman

A Review of the Method for Setting Shrimp Season was an agenda item requested by Commissioner Jenkins. He explained he was confused about the procedure followed this year in the setting of the shrimp season and the deviations that occurred. Commissioner Jenkins outlined to Secretary Herring five areas of concern he wanted answered. The first area of concern was "the criteria for the opening dates and the history of development of this criteria". Mr. Corky Perret felt the Commission did not deviate much in setting the shrimp season this year. He began the discussion by stating fishermen used to talk about the way they would fish the first of April. Historically, when the topic of shrimp was discussed, the shrimp being referred to was the white shrimp and ~~since then until now, the white shrimp was probably the best~~ <sup>FROM</sup> ~~tasting shrimp. The catches made during the early parts of April~~ <sup>Fishing</sup> ~~was to catch the overwintering of white shrimp that were in inshore waters. Then Mr. Perret read the following statement from a report prepared for the Commission by the Marine Fisheries Division:~~ <sup>established</sup> ~~"Prior to the enactment of the present program, unrestrained fishing effort during late April and early May of the late 50's in quest of the spring white shrimp found in the inland waters destroyed the juvenile brown population in its infancy". During the 60's, the industry, legislature and department went with a May opening date because of those findings in order to have brown shrimp production. However, there have been situations in the past~~

~~that occurred~~ where white shrimp were taken that did not jeopardize the brown shrimp season. Commissioner Jenkins asked what was the criteria for opening shrimp season. Mr. Perret advised it was when the majority of the shrimp are 100 count and larger. Going on, Commissioner Jenkins asked how did this come about, had it ever been changed and who has the authority to change it. Mr. Perret stated the 100 count was only a benchmark the Department shoots for. Chairman Jones asked if it was a statute or law and Mr. Perret stated it was neither.

Commissioner Jenkins then asked what criteria ~~does~~ the other states use in setting their shrimp seasons. Mr. Perret reported Florida opened their season using different regions, Alabama and Mississippi used a 68 count and Texas opened their season by law on May 15 and closed July 15 in inshore waters. Also in Texas, there was a year round bait shrimp fishery, which is the catching of "x" number of pounds per day of live shrimp with no penalty for ~~the~~ dead shrimp. Going on, Commissioner Jenkins asked how does Texas' inshore fishery compare to Louisiana, and between the two states, do they produce the majority of shrimp from the Gulf of Mexico. Louisiana produced over 20 million pounds of brown shrimp whereas Texas produced between 12 and 15 million pounds.

2F The third area of concern for Commissioner Jenkins was the cost of collecting the data. Mr. Perret explained the breakdown of expenditures chart contained in the report with a total figure for the spring season ~~to be~~ \$163,415. Commissioner Jenkins asked why were the other samples taken and what was done with the information obtained.

complaind The fourth question from Commissioner Jenkins was, "has the Department ever explored alternate methods in Louisiana for opening the shrimp season". Mr. Perret answered yes. He further explained that now there are three zones for the brown shrimp season and white shrimp and that sometimes it was just as difficult to close a season as to open it, and then you have offshore waters. So, with all these different zones, the job was a lot more involved and Mr. Perret felt this was the route that should be taken. Commissioner Jenkins ~~explained~~ that with all of the time, effort and money spent to gather the data, ~~and then to receive information from the Legislature or the public to change the dates and the Commission~~ not use the biologists' data to make their decision. Mr. Perret reminded the Commission that the group that made the most noise about the opening dates ~~were~~ not well represented at the first meeting and also the Commission has not always followed the staff's recommendations in setting season dates. Commissioner Jenkins noted those changes did not affect livelihoods or commercial businesses, and in the last three or four years, he ~~felt~~ the thing to do was follow the Department's recommendations. Then Commissioner Jenkins asked Mr. Perret, if he had to make a recommendation at the last hour, would he have changed the opening date. they WAS HAS

*stated*  
Commissioner Cormier ~~reminded~~ <sup>stated</sup> he was one of the Commission members who changed the opening date because the data proved there ~~would not be a permanent impact to the resource, and that three or~~ <sup>were</sup> ~~four days was added to Zone 2 by opening it earlier.~~ He understood what Commissioner Jenkins stated about the legislature, but he made it clear that he listened to what the Department recommended and what the public wanted. Mr. Perret ~~informed~~ <sup>Noted</sup> that Commissioner Cormier asked if there would be any long term detrimental effect and he answered no, that shrimp are a one year crop.

Commissioner Schneider stated that ~~with~~ <sup>Noted</sup> Texas catching half as much shrimp as Louisiana and getting more money for their shrimp and the Commission ~~was~~ being pressured to open the season when the shrimp are small, it may not be a biological detriment but felt it ~~would~~ hurt the fishermen's pocketbook.

Commissioner Jenkins reminded Mr. Perret that when 50% of the shrimp are 100 count, there are 50% that are smaller than 100 count also. The last question Commissioner Jenkins had was about HCR 252 and SCR 155 and what effect should a Concurrent Resolution have on the action of the Commission. Mr. Don Puckett expressed his opinion ~~in~~ that the Resolutions were not binding on the Commission <sup>Noted</sup> they were just expressing the wishes of the Legislature.

Mr. Brandt Savoie gave a report on the season thus far. He stated there were not as many boats fishing as in past years, catches were not very good and the shrimp were small. The area from Lake Judge Perez south to Venice produced the most shrimp. Most of the recreational shrimpers had caught their limit by 10:00 a.m. and the commercial shrimpers reported good catches. The size of the shrimp ranged from 60-70's to over 100 count with an average of 80-100's. Prices ~~went from~~ <sup>Started with</sup> fifty cents for 100 count plus 80-100 count got seventy cents, and 70-80 count got eighty cents per pound.

~~The area from~~ Grand Isle and Barataria Bay reported very poor catches of small shrimp. The sizes ranged from 60-70's up to 100-120 count and over and the average was 80-100. The prices were about ten cents more a pound than ~~those~~ in the Venice area.

The Bayou Lafourche area west to Cocodrie reported good catches in the upper areas of the marsh and not good in the lower areas. The sizes also ranged from 60-70's up to 100-120 count and the average was in the 80-100 count range. A large number of fish and an excessive amount of debris from Hurricane Andrew were reported in the area which made culling difficult.

The last area from Cocodrie to the Atchafalaya River did not have as many shrimp as the other areas did. The average size of shrimp landed were 80-100 count, but a lot of 100 plus count were caught and discarded.

The overall picture was as ~~had been~~ expected. But there were a few more shrimp closer to the Mississippi River and shrimp sizes were small and averaged 80-100 after culling. Commissioner Jenkins stated that a lot of small shrimp were killed besides the small shrimp that were kept. He then asked, based on the prices that were paid, how would 31-35 count shrimp affect the price per pound; how long does it take for a shrimp to go from 80-100 count to a 31-35 count; how many days can you actually fish for brown shrimp in Zone 2; and, if the season ~~would have been~~ delayed two more weeks, would it have been more economical for the shrimpers. Commissioner Jenkins asked if an economic model on the projected openings could be developed with the historical data already available. Chairman Jones thought the model would be very interesting. Commissioner Jenkins wondered if the Department thought it would be a good idea to attempt this job. had

Commissioner Vujnovich stated he was told that ten days before the season opened, there was an abundance of shrimp along the beach and asked if this was true, and how was the production in the St. Mary area. He then explained the reason for asking was because a freshwater diversion was pumping river water into the area.

AND Mr. Savoie told the Commission that when he contacted both Mississippi and Alabama, they could not predict when to open the shrimp season this year because they were not seeing enough shrimp to make a prediction. Chairman Jones asked why does Mississippi use the 68 count, why does Louisiana use the 100 count, and then noted a large discrepancy between Mississippi and Alabama in association with Louisiana. Mr. Roussel read a paragraph on page 2 of the report as to why the 100 count was selected.

Commissioner Schneider asked Mr. Perret if the fleet has changed over time; since technology has changed, can not the small boat fleet go after the shrimp now, and has the industry adapted to the change also; and was the economic pressure causing the size of the shrimp to be reduced. o

Mr. Savoie gave a report on Zones 1 and 3. He reported Zone 3 was seeing a few more shrimp but the size was still small. Zone 1 was seeing quite a few more shrimp with at least 3 populations showing up. In Zone 1, there would probably be a little larger size shrimp by opening date than what was in Zone 2. Mr. Perret invited the Commission Members to go with the staff next spring on some of the trips to monitor the shrimp situation.

Commissioner Jenkins thanked Mr. Perret and his staff for the report and Commissioner Schneider agreed. Then Commissioner Jenkins made a motion to adopt a resolution. The motion read as follows: "I move that the Marine Division or the appropriate division in the Department in cooperation with the Finance Division create an economic model to show from our historical catch and price data, the net income to the shrimp industry of taking shrimp"

at different sizes". The motion was seconded by Commissioner Cormier. The motion passed unanimously.

After returning from lunch, the Commissioners were given a packet of information on legislative activities and took time to review it.

*Present* A Report on the Status/Activity of the Department's Finance Committee was given by Mr. Fred Prejean. He presented the Commission with factual matters that came from the two Finance Meetings held thus far, copies of the minutes from the meetings, other data on generating revenue and the public's response to funding mechanisms. The creation of the Committee was to satisfy the Department's funding needs and ~~mainly~~ those for long range purposes. The Committee also needed to determine what size pie was needed before determining how to divide it. The Committee was also prepared to utilize the wisdom of the staff and public while looking at the cost benefit relationship of each program. The source, allocation and application of revenue in support of each program and the benefits of the program would be looked at and *to decide* this would allow the public to see where each dollar comes from, *AND* where it was spent and what should be the final goal. Public involvement, such as briefing on the current status of the Department, and a forum to receive input would be created. A tool was being developed to evaluate and prioritize all the Department's programs. Each division was prepared to identify all programs that are statutorily mandated, those programs that were active and those not active, and those programs ~~active~~ but currently mandated. *INACTIVE* The notion the Department was just sitting back while the money was being taken away from us was not true, *but* the Department has been working for several months on some funding mechanisms. The perception has been the absence of revenue has caused most of the problems that the Department has encountered during the legislative session, but also there ~~has~~ been management *have* problems. The task of the Finance Committee was to find monies to finance the different programs. Mr. Prejean concluded by advising the next Finance Committee meeting would be held on June 16, 1993 at 10:00 a.m. in the Baton Rouge Office.

Commissioner Jenkins asked Mr. Prejean to send out a reminder notice in advance. Going on, Commissioner Jenkins asked Mr. Prejean if he felt there would be a problem or lack of capability in constructing an economic model on the shrimp business. Commissioner Schneider asked if the funding mechanism chart was correlated with the management pilot survey results. Commissioner Jenkins, on behalf of the Commission, complimented Mr. Prejean on the job performed.

Civil Restitution and Class 1 Update computer printouts were provided by Ms. Wynnette Kees to the Commission members. She stated to Chairman Jones a copy of the opinion issued by the Hearing Officer on the Winn Parish case had been received and the

defendant does owe for Civil Restitution. Commissioner Jenkins inquired on two columns on the printouts, "Amount Paid" and "Discounts Taken", and was the "Amount Paid" a net amount. Chairman Jones commented the cost of being an outlaw was going up and hoped being an outlaw would become non-existent. Ms. Kees reported it was beginning to work better.

Chairman Jones asked Ms. Kees to introduce the Attorney who would present the **Collection Attorney's Report**. Mr. Brian Babin stated he dealt with 300 files that were generally dated two plus years. An effort to send personal collection letters to the 300 violators resulted with about 15% being returned by mail. The recoveries to date amounted to \$5,697 out of approximately 250 people the letters have reached with a net proceed of \$4273 to the Department. Mr. Babin stated he does receive input from Assistant District Attorney's and passes this information along to the Department's Legal staff. He then explained how the new system for handling citations would work. Chairman Jones asked Mr. Babin if the people he contacted ~~was~~ getting the message that being an outlaw does not pay. Commissioner Schneider asked if the old cases would be lost because of the statute of limitations. Chairman Jones stated he hoped it was working. *WORE*

The **Monthly Law Enforcement Report for May** was given by Col. Winton Vidrine. He began by thanking Mr. Dave Hall, Mr. Bill Ferguson and Mr. David Boudreaux for the comments made toward the Enforcement Officers. He also stated he encouraged his agents to work with the Federal agents and if a problem should arise, to help out if necessary. An annual meeting in August or September was held to discuss the new Federal regulations.

Col. Vidrine felt the goose creeping regulation should be done away with and to try to get another regulation that would be prosecutable. *AN ATTEMPT WAS*

The following numbers of citations were issued during the month of May.

Region I - Minden - 120 citations.

Region II - Monroe - 197 citations.

Region III - Alexandria - 223 citations.

Region IV - Ferriday - 97 citations.

Region V - Lake Charles - 165 citations.

Region VI - Opelousas - 241 citations.

Region VII - Baton Rouge - 260 citations.

Region VIII - New Orleans - 240 citations. Commissioner Jenkins asked about a citation for blocking the passage of fish, and was there a requirement on the number of openings for a certain size net.

Region IX - Thibodaux - 379 citations.

Oyster Strike Force - 53 citations.

Statewide Strike Force - 203 citations. Commissioner Jenkins asked what happened to the marijuana that was seized. Col. Vidrine commented the Enforcement plane usually worked where the Statewide Strike Force was working. However, one of the pontoons developed a leak and assistance received from Chief Pilot Gene Rackle was very much appreciated. Since the Statewide Strike Force was in existence, there are personnel in the Grand Isle area all the time now and the housing of the agents were with the cooperation of people from the Marine Fisheries Division acknowledged Col. Vidrine.

Offshore Boats - 44 citations.

The grand total of citations issued statewide for the month of May was 1,965.

An investigation was being conducted on two enforcement agents the Commission members had received correspondence on advised Col. Vidrine.

Commissioner Schneider thanked Major Whitehead for the good job the Statewide Strike Force was doing.

The District Attorney's Report was given by Col. Winton Vidrine. The Computer Section put the two reports together, which included a parish summary and a detailed summary by parish by code of each violation. Commissioner Jenkins stated the idea of the report was to get the cooperation of the Attorney's so the tracking of the tickets issued could be followed. But the report presented at the meeting showed more than 50% of the District Attorney's were not doing anything and he asked if the Department was receiving less cooperation or why there was not much reaction, and if there was one employee in the Department to communicate with the District Attorney's. Commissioner Jenkins then requested the item be placed on the agenda for the next meeting to answer why the cooperation was not occurring and how the program could be rejuvenated. Also, Commissioner Jenkins asked what was the difference between "no action" and "nol pros", would the effect be the same, and was there a statute of limitations for "no action" violations.

The Secretary's Report to the Commission was the next item given by Secretary Herring. There were educational activities during the month which included people from the State of Missouri

picking up species along the Gulf coast and participating in classes at the Marine Lab.

Renovations to the bottom floor of the dormitory facility and the holding ponds at the Marine Lab continued from money received because of Hurricane Andrew. Mr. Phil Bowman, of the Marine Fisheries Division, has been working with other agencies and the Corps of Engineers on the Bonnet Carre Spillway Freshwater Diversion.

Two <sup>Employees</sup> ~~personnel~~ from the Department have met with the Oil Spill Drill Team and are preparing to participate in an exercise later on during July.

AND The Inland Fisheries Division <sup>is</sup> ~~was~~ working with Dow Chemical Company and removed another 300,000 bass and put them into the Atchafalaya River. Also stocked into the Atchafalaya were 400,000 Florida bass from Texas, 1300,000 largemouth bass from Georgia. A statewide stocking of 1,424,000 bass has also occurred. Toledo Bend and Indian Creek Reservoir received a total of 42,463 striped bass.

A total of 2,516 acres of vegetation was sprayed by the Water Hyacinth Section during the month.

The Education Section has participated in 15 fishing clinics with about 8,000 students, there were hunter education clinics, 2 bow hunter clinics with 78 students, 5 Project Wild workshops with 90 participants, and 3 boating safety clinics with only 30 participants. Other divisions in the Department, along with other agencies, would be helping the Education Section with the National Safe Boating Week and National Fishing Week.

Secretary Herring then asked Mr. Harry Blanchet to give a report on the Menhaden Fish Kill and Mr. Pete Juneau to report on the Ridley's Sea Turtle die-offs. Mr. Blanchet explained two menhaden vessels working near Empire had an accidental release of the Atlantic Thread Herring and some Menhaden, ~~also~~ Because of the composition of the thread herring, the fish floated onto Grand Isle instead of decomposing. Then he gave background information on the Atlantic thread herring. Chairman Jones asked why did the fish concentrate in one area in Florida?

Mr. Pete Juneau advised approximately 35 dead sea turtles had washed onto Grand Isle beach and the City of Grand Isle buried them immediately. A total of dead sea turtles, as of the meeting date, was approximately 80. The National Marine Fisheries Service had been contacted, a person came and identified the turtle, and tried to determine what caused the kill. An employee of the Aquarium of the Americas took some of the specimens and performed necropsies on the turtles. The staff was still waiting to hear results of the tests and was still working with the National Marine Fisheries

Service. Commissioner Jenkins asked if the City of Grand Isle knew what species the turtles were when they buried them, and did they know they were Endangered Species turtles. The Coast Guard sent a helicopter to survey the area and the other district offices were notified to report any sightings.

Secretary Herring thanked Mr. Dave Hall and Mr. Bill Ferguson from the Fish and Wildlife Service for attending the meeting.

A motion to set the **September 1993 Meeting Date** ~~was scheduled~~ for September 2, 1993 in the Baton Rouge office, beginning at 10:00 a.m. was made by Commissioner Vujnovich and seconded by Commissioner Schneider. The motion passed unanimously.

Commissioner Jenkins asked to consider holding the August Commission Meeting in Grand Isle. This suggestion was well received except it was noted the waterfowl season dates would be set at that meeting.

Chairman Jones called for **Public Comments** and received none.

Commissioner Jenkins made a motion to **Adjourn** the meeting and was seconded by Commissioner Schneider.

1993-94 RESIDENT SEASONS  
Written Public Comment Summary

- Reduce Doe Day in Iberville Parish - 1 letter representing 1,084 names on a petition. We have now discovered the real problem is a public lands problem, not a deer problem, and the local Senator is working with the State Land Office to resolve this issue.
- Open hunting one week earlier and close one week later - 1 letter
- Create a new Area VII for deer - 1 letter with a petition attached with 347 signatures.
- Extend Area VI deer season by one week - 27 letters of which 26 were a form letter.
- Open deer and duck season on separate dates - 2 letters representing 55 club members.
- Change goose creeping regulation - 1 letter

February 12, 1993

Govenor Edwin Edwards  
P. O. Box 94004  
Baton Rouge, LA 70804

Dear Govenor Edwards

I am sending you this letter to ask for your help with the Iberville Parish Deer Hunting Rules and Regulations. Over the past ten years the Whitetail deer population has become very low. Years ago a doe season was opened to reduce the population. Now, years later, the population has thined out and there is still a doe season. Many does and yearlings are being killed during these five days. Some deer are even being killed by outlaws at night in many areas. Also during the five days of doe season, the woods become crowded with hunters, resulting in fatal accidents.

People deer hunt for several different reasons, some for the meat, some for a hobby or a trophy buck. With all of this in mind, I decided to pass a petition to change these rules and regualtions. Attached is the petition with 1,084 names that I have collected so far.

Mr. Kerney Sonnier, district 6 Supervisor, Mr. Tom Greene State Senator, and myself have scheduled a meeting for Wednesday, March 3rd to further discuss these changes. The meeting will be held to Tom Greene's Vet Clinic in Livonia at 4:00 p.m.

We hope you, Govenor Edwards, could talk to the Wildlife & Fisheries about these ideas. We would also like to have your input and a response to this matter.

Sincerely

*Marvin David*

Dear Mr. Herring

Eric and I are two twelve year old hunters. We are wondering if you could open hunting season one month earlier, and at the end of the leave it open one month later. Please send us some information about reservations to hunt at.

Sincerely yours,  
William Dunkin  
Eric Holland

RECEIVED  
MAR 05 93  
TREASURER  
SECRETARY

Ray Markerson  
237 Bayou Blvd Lane  
Franklin, Louisiana 70530

Sir:

Enclosed you will find just a sampling of people in St Mary, Iberville Parish Area that believe a separate Zone 7 for hunting deer is needed and wanted. Most would have wanted the proposal of last year. It is generally felt dog hunters have for too long had an upper (and unfair) hand.

The proposal for this year is not equal but will give help in the area of managing our herds better for future generations.

A positive vote for this issue would be appreciated and remembered. Thanking you in Advance, I am

347 signatures

Sincerely

Ray Markerson

Baton Rouge, La. 70896-2000

RE: Hunting Season

Dear Mr. Prickett:

On behalf of *E. A. R. H. C.* we  
would like for the deer season of 1993-1994 to run December 4 through  
January 23 totaling 51 days with or without dogs instead of December 4  
through Jan 17 totaling 45 days with or without dogs. We feel with mild  
winters in Area 6 that the major rut doesn't occur until this time.

Your consideration to put this request into effect would be greatly  
appreciated. Thank you.

Baton Rouge, Louisiana 70898-9000

Dear Mr. Bateman:

The Thomas Tract Hunting Club has managed an area encompassing 750 acres in West Baton Rouge Parish for whitetail deer for the past 8 years. During this time, the Department of Wildlife and Fisheries has provided technical assistance to our organization in an effort to improve the deer herd and thus hunter success on our property. Our organization has been enrolled in the Department's DMAP program for the past 3 years. These efforts have benefitted our organization in that the average weights of the deer harvested has increased dramatically over that observed when we first took over the property.

During the 8 years we have managed this property, we have observed that the peak deer movement and subsequent harvest, both in number and quality of animals, have occurred during the last 7 to 14 days of the season. In most years more "scrapes" and "rubs" were actually observed after the season had closed indicating that peak deer movement had actually occurred after the season. As you know, this peak movement is associated with the breeding season which indicates to us that the peak of the breeding season is occurring in our area (Area 6) after the hunting season. Further evidence of this is the fact that during the 8 years we have managed the property we have observed spotted fawns on our lease all during November and as late as the third week in December. It is our opinion that the season being closed before this peak movement has adversely impacted our hunter opportunity and subsequent harvest.

In reviewing the Notice of Intent for the 1993/94 hunting seasons passed by the Wildlife and Fisheries Commission it has come to our attention that the Commission has established a deer management Area 7 in south Louisiana. The season framework that has been proposed for Area 7 extends the season through January 23, 1994. This is 7 days later than the proposed season for Area 6.

Mr. Hugh Bateman  
May 14, 1993  
Page 2

Based on our harvest information and observations relative to the peak breeding season indicating our hunter success could be further enhanced by extending the season later in January, we are requesting the Louisiana Wildlife and Fisheries Commission amend the 1993/94 deer hunting season in Area 6 allowing the season to extend through January 30, 1994 or at least through January 23, 1994 to be consistent with the season framework established for Area 7.

On behalf of the Thomas Tract Hunting Club, I wish to take this opportunity to thank you and the Commission for consideration of this request and for the opportunity to comment on the proposed 1993/94 hunting regulations.

Sincerely,

A handwritten signature in black ink, appearing to read "Max Summers", with a long horizontal flourish extending to the right.

Max Summers, President

MR. HUGH A. BATEMAN  
ADMINISTRATOR  
WILDLIFE DIVISION  
BOX. 98000  
BATON ROUGE, LA. 70898

DEAR MR. BATEMAN:

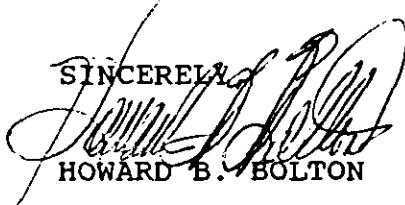

I HAVE JUST RECEIVED A COPY OF THE NOTICE OF INTENT IN THE APRIL, LOUISIANA REGISTER CONCERNING THE PROPOSED DATES FOR THE 1993-94 HUNTING SEASONS AND REGULATIONS.

I HAVE NO PROBLEM WITH THESE DATES, HOWEVER LAST YEAR THE OPENING FOR THE DEER AND DUCK SEASONS WAS ON THE SAME DATE, AND WITH THIS I HAVE A PROBLEM.

OVER MANY YEARS OF HUNTING AND FISHING AND IN GENERAL ENJOYING THE OUT-OF-DOORS WE ALL DEVELOP CLOSE FRIENDS AND RELATIONSHIPS WHICH WE CHERISH AND HOLD DEAR TO OUR HEARTS. NOTHING IS ANY MORE ENJOYABLE THAN THE ANTICIPATION OF THE OPENING OF A HUNTING SEASON AND THE COMRADERY ENJOYED BY ALL AROUND THE HUNTING CAMP THE DAY OR NIGHT BEFORE.

IN 1992 I HAD TO MAKE A CHOICE BETWEEN THE DEER OR THE DUCK CAMP AND I STILL FEEL AS THOUGH I WAS CHEATED. IT DID NOT EFFECT THE DUCKS OR THE DEER POPULATION AND I FEEL WITH GOOD PLANNING BY THE COMMISSION THIS MAY BE AVOIDED IN THE FUTURE.

WOULD YOU PLEASE ASK THE COMMISSION TO TAKE THIS INTO CONSIDERATION WHEN SETTING THE SEASONS IN THE FUTURE.

SINCERELY  
  
HOWARD B. BOLTON

PS-- I think the opening of the second split of the duck season in the Western Zone on the day after Christmas was also in bad taste.

Mr. Hugh Bateman  
Wildlife Division, LDWF  
P.O. Box 9800  
Baton Rouge La 70898

Dear Hugh;

This is comment on the proposed 1993-94 hunting dates.  
I have no suggestions for changes to the proposed dates.

What I do suggest, however, is that you avoid  
having concurrent opening dates on ducks and deer.  
as you know, the preponderance of hunting on private  
lands is done by groups of hunters who have formed  
together to form clubs, who either hunt on family lands  
or lease from other landowners. To these clubs, opening  
week-ends are a special occasion, where the whole  
club, including guests + youngsters, turn out for a  
camping and hunting weekend.

To force these hunting groups to choose between  
ducks and deer results in destroying the complete  
enjoyment of two full week-ends. It also results in  
a reduction in the purchase of big game permits, for  
many of the people who choose to go duck hunting,  
and so miss deer opening, never purchase a big game tag.

I would appreciate your consideration on this.

P.S. I was asked to write this letter by my  
35 member Hunting Club (Bay Trees Hunting Club Inc.) Sincerely  
and my 20 member duck club (Hog Island) unincorporated. Jeff Hughes J.

REF: Withdrawal of  
Board Resolution on  
Goose Creeping Ban

Gentlemen,

In 1989 LA Wildlife & Fisheries Board passed a resolution to ban goose creeping in Louisiana. This resolution was passed, and justifiably so out of embarrassment and shame, when less than 200 people out of a total of 200,000 licensed hunters, were responsible. Gentlemen, this is a democracy, please don't let such a minute majority control our freedom or hunting heritage which we have battled for over two centuries. Please let me make you aware of some facts:

- 1) Louisiana is the only state with a ban on goose creeping.
- 2) The statute is vague and hard to understand as it took three years to write and adopt.
- 3) Since it's adoption, only a few cases have been cited and none in the last three years.
- 4) The number of geese wintering in Louisiana is at an all time high.
- 5) Most, if not all, local, state and Federal Wildlife agents agree that the ban on goose creeping is no longer necessary and has served its purpose.

Please consider the request of all duck and goose hunters and vote to remove the ban on goose creeping as it would only take a resolution by the LA Wildlife & Fisheries Commission.

Please call me if I can be of further assistance.

Sincerely,

Carl W. Gremillion, Sr.

TO WHOM IT MAY CONCERN:

### RETENTION OF THE NO GOOSE CREEPING LAW

There is a move being generated to remove this law from the books and I cannot believe what I am hearing. Anyone who believes this a sportsman like way to hunt should acquaint themselves with the video that was made a few years ago on this "noble" activity: a group of our finest sports got behind a levee and crept up on a few thousand snow geese. When they were almost on top of the geese, these find lads rose up in unison and blasted into the unsuspecting geese. The end result was dead and crippled geese all over the place with other cripples dropping out of the flock of hastily departing geese. Something like 157 geese were killed in the particular slaughter and this was our lads second "shoot" of the day!

Law enforcement people claim the law is hard to enforce and that the U.S. Attorney does not want to try the cases. If that is the case, there must be a loop hole. If so, tighten up the law even more but do not get rid of it. By repealing the law, we are saying that it is perfectly fine to take game in such a manner - maybe we ought to legalize the spot lighting of deer or the selling of game fish. At least having the law on the books, acts as preventative medicine in many cases.

I read an article in the Jennings paper early this spring stating that the law should be removed because it made it difficult for some of the hunting clubs to get geese for their clients. The geese sat in large fields and the hunters could not get at them. Since when was game or fish guaranteed to people - just enjoying being out in the field is supposed to be part of the deal. Further, this article failed to state that goose production for most of the Arctic nesters was a near bust in 1992 (late spring) less than 7% young in the fall flight for snow geese and these experienced birds did not like getting shot and were hard to decoy.

My side of the coin is in favor of the resource but I enjoy hunting a great deal. Wise use can perpetuate this sport for years to come and there is no place for the game hog. If we lose this law it will be a step backward.

## "Creeping", It's Not For The Birds

While it may seem strange to be discussing goose hunting in the middle of May, there's an urgency to quell a fire that could be brewing in our midst at this very moment. I've been advised that during the summer meetings of the Louisiana Wildlife and Fisheries Commission, there will be a push to have the "No Creeping" goose law removed from the books.

Such a move would probably strike many of us differently. We all have an opinion and many of us are desperate to correct what seems to be a deteriorating situation in waterfowling. But friends, after studying the facts, I feel safe to say that creeping geese is not the answer to any problem. Reversal of this law at this time would ultimately lead to the waterfowler's worst nightmare, that being no geese, period.

To better understand the overall picture, let's look at some facts and history. First of all, the goose creeping regulation states, "It shall be unlawful to approach geese by creeping, crawling, or stalking for the purpose of taking geese or thereafter causing geese to be taken." For all practical purposes, "taking" means shooting with a gun.

The practice of creeping geese originated when the first Europeans were settling the state. They didn't have time to hunt conventionally and needed to feed their families. There was plenty of waterfowl and they only took what they needed for the table. Creeping became an accepted method of hunting.

So what's unacceptable about creeping geese today? It's almost impossible to sneak up on a concentration of geese and kill or cripple less than the legal limit. Creepers usually are tempted to practice other violations such shooting from the road or a vehicle. It's not a sporting method of taking game and is unethical. But more importantly, it changes the behavior pattern of geese and once that occurs, it's virtually irreversible.

Some of you may remember when Canada geese were common in Louisiana. Well, it's not the case anymore. Increased pressure and harassment changed their behavior. They began stopping north of their usual destination to satisfy their needs and avoid stress.

Folks in the know are afraid the same thing will happen to our snows, blues and speckbellies. Geese need time to rest and if so-called hunters keep popping them every thirty minutes, They will eventually vacate the area to potentially never return.

Thanks to the "no creeping" regulation, these geese haven't been instinctively forced to short-stop yet. But hunters are currently witnessing a side effect of earlier creeping. The increased stress has taught the birds to congregate in huge numbers.

This "safety in numbers" syndrome has many well-intentioned hunters

scratching their heads in puzzlement. Some feel that the birds need to be stirred, irregardless of the method. Wrong! Studies show that additional harassment will only result in total displacement.

When I was growing up in central Louisiana, few of us knew what wild waterfowl was. Today these folks are enjoying some of the best waterfowling in the country. These birds have learned to avoid the constant pummeling they receive down here and someday may not bother to come at all.

The good news is that there are some things we can do to help our situation. In hunting, we need to be more patient and refine our methods. This can done through observation, study and experimentation.

In regards to creeping and other harassment, we need to be more vocal. Such tactics are for outlaws and we don't need them setting policy for the sport of goose hunting. Contact your elected officials, attend meetings, write letters and speak your mind.

We can't afford to allow a few greedy people to rob us of a heritage. It would be a sad day when we might spend an entire season in the field and never so much as hear or see a goose. That's what we have to look forward to if the harassment is not curtailed and kept in check.

## Goose hunters regroup for second split

During this brief break in the goose season, some of you probably have kicked back and are wondering what can be done to improve things when it opens again Saturday.

Sadly enough, there may not be a whole lot you can do because it depends heavily on the location being hunted. The geese in our area are only using certain fields for congregation and if you're not in or near them, then you're out of luck.

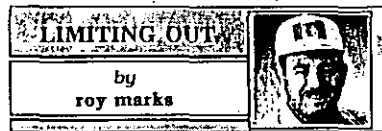

Even the most elaborate spread of decoys had little effect during the first split when set out between points of congregation. The birds would lock up occasionally and circle once or twice, but rarely would they drop low enough for a decent shot.

The secret to success involves setting up shop as close as possible to the big concentrations of geese. This necessitates regular scouting and gaining permission from landowners to hunt.

Since the advent of the "no creeping" law, field blinds with permanent decoy spreads have really fallen by the wayside. They just don't produce like they once did. Good hunts are the exception, not the rule.

As the season progresses, however, results could improve for all hunters. More extreme weather and scarcity of food should start to scatter the birds somewhat. Then and only then will they fall victim to an average spread in the middle of nowhere.

Many different people, including hunters, farmers and biologists are concerned about the pregarious behavior of geese. Protected by law, they pile into an area by the thousands until it is completely stripped of grain, and/or vegeta-

tion. An outbreak of disease in such a population would spell instant disaster.

The "no creeping" law really hasn't accomplished what it was intended for. True, something had to be done about killing or crippling scores of geese in one volley of shots, but not by making it nearly impossible to get one bird. Good or bad, creeping kept the geese stirred up and everybody seemed to get a shot now and then.

It will be interesting to see how the biologists and lawmakers attack the current problem for it's real and they are aware of it. Larger bag limits and longer seasons have't helped, so common sense mandates a different approach. But what might it be, as creeping is surely a thing of the past?

The guys following the geese have done well with a setup known as a "rag spread." Such a setup doesn't actually involve rags, but squares of white plastic instead.

A knot is tied in one end of the three-foot square and it is draped over a quarter-inch dowel and shoved into the ground. The knot simulates a feeding head and the slightest breeze moves the body in a waddling fashion. Other configurations of the plastic and dowels simulate geese landing or taking off. Rag hunting usually involves a good number of shooters. It

takes a crowd to put out a thousand plus rags and if the shooting is good, they will be able to take advantage of the situation.

Once everything is set up, the hunters clad in white coveralls will lay or sit on white plywood pallets among the rags. For the best shooting, one should be positioned on the upwind side of the decoys. The rest is pretty much left up to the geese and there will be some action.

The rags are collected after each hunt and even though this involves a lot of work, it keeps the geese guessing. They can't get used to seeing the same spread in the same field day after day.

While a rag spread resembles a large flock of snows and blues, it is particularly luring for speckle-bellies. These grand birds are easily duped by the rags and a little calling makes them drop right in.

Hunting over rags seems like the only way to go after geese nowadays. I have very limited experience with the method, but have seen powerful videos and talked with local hunters who only have praise for it.

One thing is for sure as the next split approaches. I'll be looking for a big rag spread with an empty pallet.

LOUISIANA SNOW/WHITE-FRONTED GOOSE REPORT  
1992-93

Above average rainfall occurred in South Louisiana from mid-October through the remainder of the winter. Sheet water in agriculture areas was abundant by November, earlier than the last three winters, and was maintained by frequent rains. Reduced fall plowing resulted from these early wet conditions. Other than a few cool fronts in November, winter conditions were characterized by exceptionally mild temperatures, without a freeze in most of the coastal zone through January.

Precise timing of goose migrations into Louisiana are usually difficult to establish due to the large size of the wintering area. However, in 1992 large numbers of white-fronted geese arrived en masse on October 11-13 in southwest rice prairies. Early cool fronts in October/November encouraged additional migrations, but geese were widely distributed due to the abundance of sheet water. Mid-December counts for snow and white-fronted geese were 280,000 and 81,000, respectively, down 23% from 1991 for snows and 16% for white-fronts. These reduced counts in mid-December were primarily due to incomplete surveys in central and northeast regions of the state. November counts from these sections of the state indicated 137,000 snow and 28,000 white-fronted geese. The eastward expansion of the white-fronts' winter range into southeast fresh marshes was documented for the first time with a December count of 1,600.

There was a statewide split season for goose hunting with season dates for snow and white-fronted geese from November 21 - December 12 and December 19 - February 4. A snow goose only season continued for 10 days to February 14. Hunting success was generally low this year, particularly for snow geese. Excessive, early rains permitted wide distribution of geese and reduced hunter success. The low proportion of young in the fall flights of the two goose species also contributed to lower success rates. White-front productivity information obtained by the USFWS indicates 21.8% young and an average family size of 1.58 from wintering flocks observed this year in Louisiana. Data for 1991-92 was 30.3% and 1.41.

A large number of neck collars on white-fronted geese have been observed once again this winter. Preliminary analysis of collar observations from the three previous winters indicates 418 unique collars were recorded. Banding origins were from a broad region across the Arctic; 205 (49%) from the Central Arctic (East & West combined), 111 (27%) from the Western Canadian Arctic, 78 (19%) from the Inglis River, 20 (5%) from Alaska and 3 collars from West Hudson Bay. The 78 collars observed that were banded at the Inglis River was 24% of the total (326) banded at that location in 1991 and the 3 recorded from West Hudson Bay represent 60% of the total (5) marked at that site.

## SNOW GOOSE REPORT 1993

### MANITOBA - GILLESPIE

Nest initiation at La Perouse Bay (LPB) on Cape Churchill in 1992 was on 4 June, the 2nd latest in 25 years. The average clutch size at laying was relatively low at 3.65 as was the clutch size at hatch 3.70. Both were the lowest estimates since 1989. Nest failure during initiation was minimal but this was offset by the highest recorded nest failure during incubation of 29%. Productivity was the lowest on record at .23 goslings per adult, established at the time of banding, a 79% reduction from last year's figure of 1.08.

Research at LPB suggests that the salt marsh degradation has reached a critical point. The intense overgrazing and spring grubbing of this area has lead to hypersalinity, eutrophication and the establishment of algal mats, reducing their utility to feeding geese.

Recent changes at the LPB colony have shown a decrease in adult fecundity and gosling survival brought on by the declining brood rearing habitat. At the same time, adult survival has increased due to the decreased flyway harvest.

Productivity was very poor throughout the entire Hudson Bay region. Production appeared to be significantly reduced due to the extremely late spring. Consistent with decreased production was the lack of young birds observed in feeding flocks in southern Manitoba.

Snow geese began arriving in southern Manitoba during the second week of September. Cereal grain was about 60 - 70% swathed and 10% combined. Fall tillage of fields had not begun. Rainfall was general resulting in most fields being too wet for farm machinery.

The 1992 snow goose harvest estimate at Oak Hammock was 750 birds, a decrease of 65% from the 1991 estimate of 2458. Harvest of snow geese at Oak Hammock has continued to decline over the past four years despite there being a high population of snow geese utilizing the management area. Generally, hunter opportunity and success were down due to the lack of young in the flocks. Flocks comprised primarily of adults tend to be more difficult to decoy. Provincial harvest is expected to be below normal.

No reports of necrotic enteritis were received during 1992.

and on Department owned, managed, leased or controlled lands, a 100 yard restriction shall apply;

(v) It is unlawful for any person to remove fur-bearing mammals from, or to move or disturb in any manner, the traps owned by another person without written authorization of the owner to do so;

(w) It is unlawful for any owner of a dog to knowingly or wantonly allow his or her dog to pursue, harass or kill deer;

(x) It is unlawful for any person to wantonly or carelessly injure or destroy, in any manner whatsoever, any real or personal property on the land of another while engaged in hunting or trapping thereon;

(y) It is unlawful to hunt wild game protected by this Act between sunset and sunrise except that hunting hours between sunset and sunrise may be established by administrative order for fur-bearing mammals, deer, wild turkey and migratory waterfowl;

(z) It is unlawful to take any game bird (excluding wild turkeys), migratory game birds or migratory waterfowl protected by this Act when not flying, except crippled birds otherwise irretrievable;

(aa) It is unlawful to use or possess any device that may be used for tree climbing or cutting, while hunting fur-bearing mammals;

(bb) It is unlawful for any person, except licensed game breeders, pursuant to Section 2.29 to import, carry into or possess alive in this State, any species of wildlife taken outside of this State without obtaining permission to do so from the Director;

(cc) It is unlawful for any person to have in their possession any freshly killed species protected by this Act during the season closed for taking;

(dd) It is unlawful to take any species protected by this Act and retain it alive;

(ee) It is unlawful to possess any rifle while in the field during gun deer season except as provided in Section 2.26 and administrative orders.

This Section shall apply only to those species protected by this Act taken within the State. Any species or any parts thereof, legally taken in and transported from other states or countries may be possessed within the State, except as provided in this Section and Sections 2.35, 2.36 and 3.21.

Nothing contained in this Section shall prohibit the use of bow and arrow.

Nothing contained in this Section shall prohibit the Director from issuing permits to paraplegics or persons physically unable to walk, to shoot or hunt from a standing vehicle, provided that such is otherwise in accord with this Act.

Nothing contained in this Act shall prohibit the taking of birds and mammals protected by this Act, except deer, from a boat not camouflaged or disguised to alter its identity or to further provide a place of concealment and not propelled by sail or mechanical power. However, only shotguns not larger than 10 gauge nor smaller than .410 bore loaded with not more than 3 shells of a shot size no larger than BB may be used.

Amended by P.A. 82-783, Art. III, § 30, eff. July 13, 1982; P.A. 83-722, § 2, eff. Sept. 23, 1983.

CHAPTER 61 — WILDLIFE

2.33-1. Shotguns on boat

§ 2.33-1. Notwithstanding any other provision of this Act, no person shall place, carry, possess or transport a shotgun on a boat of any type in an area under the jurisdiction of the Department of Conservation during the period March 1 to May 31, both inclusive.

No State agency shall issue or make any rule, regulation, order or agreement which is in conflict with this Section.

Added by P.A. 81-475, § 1, eff. Jan. 1, 1980.

2.33a. Traps—illegal methods

§ 2.33a. (a) It is unlawful to fail to visit and remove all animals from traps staked out, set, used, tended, placed or maintained at least once each calendar day.

(b) It is unlawful for any person to set, use, or maintain a leghold trap or one of similar construction on land, that has a jaw spread of larger than 6½ inches (16.6 CM), or a body-gripping trap or one of similar construction having a jaw spread larger than 7 inches (17.8 CM) on a side if square and 8 inches (20.4 CM) if round;

(c) It is unlawful for any person to set, use, or maintain a leghold trap or one of similar construction in water, that has a jaw spread of larger than 7½ inches (19.1 CM), or a body-gripping trap or one of similar construction having a jaw spread larger than 10 inches (25.4 CM) on a side if square and 12 inches (30.5 CM) if round;

(d) It is unlawful to use any trap with saw-toothed, spiked, or toothed jaws;

(e) It is unlawful to destroy, disturb or in any manner interfere with dams, lodges, burrows or feed beds of beaver while trapping for beaver or to set a trap inside a muskrat house or beaver lodge, except that this shall not apply to Drainage Districts who are acting pursuant to the provisions of Section 3.37;

(f) It is unlawful to trap beaver with a leghold trap or one of similar construction having a jaw spread of less than 5½ inches (13.9 CM) or more than 7½ inches (19.1 CM) except that this shall not apply during the open season for trapping muskrats;

(g) It is unlawful to set traps closer than 10 feet (3.05 M) from any hole or den which may be occupied by a game mammal or fur-bearing mammal except that this restriction shall not apply to water sets.

(h) It is unlawful to trap or attempt to trap any fur-bearing mammal with any colony, cage, box, or stove-pipe trap designed to take more than one mammal at a single setting.

(i) It is unlawful for any person to make any set or place any trap or any part thereof including chain, or drag designed to take any fur-bearing mammal protected by this Act during the closed trapping season. Proof that any part of any trap including the trap itself, chain, or drag was placed during the closed trapping season shall be deemed prima facie evidence of a violation of this provision.

(j) It is unlawful to place, set, or maintain any leghold trap or one of similar construction within thirty (30) feet (9.14 m) of bait placed in such a manner or position that it is not completely covered and concealed from sight, except that this shall not apply to underwater sets. Bait shall mean and include any bait composed of mammal, bird, or fish flesh, fur, hide, entrails or feathers.

MEMORANDUM

TO: Game Division Supervisory Personnel

FROM: Hugh Bateman, Chief, Game Division *HAB*

SUBJECT: Change in Methods by Which Geese in Louisiana can Legally be Hunted

The Commission at it's July 9th meeting here in Baton Rouge took the following action, "It shall be unlawful to creep, stalk, or crawl toward feeding or resting geese for the purpose of taking such geese or thereafter causing such geese to be taken."

This action is unprecedented as it basically prohibits the hunting or shooting of geese of any kind and in any number by the above method. A violation of this Commission action could be prosecuted in federal court as all state laws or Commission action pertaining to migratory birds automatically becomes federal law. The current law book (page 17) defines "take" in its different tenses as the attempt or act of hooking, pursuing, netting, capturing, snaring, trapping, shooting, hunting, wounding or killing by any means or device. This regulation will be in effect for the upcoming hunting season and thereafter unless repealed by the Commission.

There is apparently a growing abuse of "goose creeping" in Southwest Louisiana which results in excessive over bagging and severe crippling losses when large flocks of resting or feeding geese are shot into. Last hunting season there was a strong push by state and federal enforcement agents to curb this type of activity in Southwest Louisiana ricefields. They were successful in making several cases which received considerable press coverage. The media stories caused outrage among many South Louisiana sportsmen who are in strong support of this new Commission action.

I'm sure everyone appreciates the considerable judgment that will be required in the field to avoid problems with this new

Commission regulation. The circumstances and situations under which this will be confusing to hunters and our personnel are numerous. Please be sure to discuss it thoroughly with your personnel prior to the waterfowl hunting seasons this fall.

The regulation will be listed in the migratory bird hunting pamphlet for this coming season and the I & E Division is planning a magazine article and news release. I have asked Col. Ray Montet to invite us to any meetings at the district level held to specifically discuss how their agents plan to enforce this new regulation.

As there are further developments on this issue we will advise.

# Creeps in Our Goose Fields

by Lloyd F. Abadie

*It's almost impossible to believe, but "creepers" are taking 150 geese in one shoot—and we are doing little to prevent it.*

**A**gain and again they come year after year, as they have done for centuries. Some years they may be early, other times late, but they come and they make their presence known as they arrive. The clamor, when they see daylight or moonlight reflected on wide expanses of water interlaced with plant growth, rises to a veritable cacophony. The blue and snow geese are back; they recognize they have reached their destination and happily tell the world about it. There's goose music throughout south-

Louisiana, a sweet sound to waterfowl hunters.

During the past five years observant outdoorsmen have noticed drastic changes in the flight and feeding patterns of these geese. Their nighttime forays have practically ceased. Are they too tired to fly?

For enlightenment, we talked with David Hall, senior resident agent with the U.S. Fish and Wildlife Service, and learned more than we expected. His remarks were shocking— all waterfowlers will be truly concerned.

"A problem has developed during the past few years which, should it continue, could have a serious effect on the blue and snow goose populations which winter in Louisiana," Hall said.

"It is a method of shooting geese which is known as creeping — creeping geese. It has concerned me for some time."

Dave Hall explained that the procedure had its origin in the early 1800s or earlier, when the first Europeans were settling Louisiana. These folks were busy with the chores of daily life and did not have the time to hunt conventionally, the way that we now consider to be hunting; sitting in a blind for longer periods of time with decoys spread before us. Besides, they usually had large families and needed fish and wildlife to sustain them.

Blue and snow geese were very abundant in coastal Louisiana marshes. The first explorers, in their diaries, tell of seeing great concentrations of these geese and of Canada geese.

Some of our first biologists, DuPratz and McIlhenny, were much impressed by the number of waterfowl they encountered. McIlhenny reported on the large concentrations of blues and snows in the early 1900s down near Cheniere au Tigre, south of what is now known as Intracoastal City. He described a flock of geese that covered approximately six square miles — there's no telling how many geese were in such a huge gathering.

Louisiana has always had great numbers of wintering blue and snow geese, and in those years creeping them to obtain food for the table was an accepted method.

Similarly, residents of the Crowley area used to build a small screen or blind and place it near the back door of a Cajun home, close to a small baited pond on which were live decoys. Observing wild ducks on the pond, the hunter would grasp the lightweight blind and crawl on his knees until he reached the edge of the pond. Then, discarding the "creep blind," he would rise and fire as the startled birds rose from the water. Cattle and horses were also used as concealment so that hunters could approach within gun range of feeding flocks.

Only enough birds needed to feed the family were taken (there was no refrigeration then), and since there were fewer hunters and so many birds, creeping had little effect on the total number of birds.

"Recent years have brought a great

*Three backbreaking loads of geese taken by the single creeper on the left, who has just been apprehended by U.S. Fish and Wildlife Service Special Agent William Ferguson, on the right. The killing took place in Jefferson Davis Parish this last February.*

increase in the amount of creeping being done, and the method has gained many refinements, if you can call them that. It is no longer hunting," Hall points out.

"It cannot be called sport, any more than doing wheelies or making doughnuts on a lawn with an automobile can be called sport — though I have heard it referred to as a hot dog sport. Instead, it has deteriorated into a contest to see who can kill the most geese...and then brag about it," Hall added.

"I am quite concerned about this practice because in my lifetime I have seen the Canada goose stop coming to Louisiana. Some of my fondest memories are of shooting ducks and geese with my father in the early 1950s on the Mississippi River," he continued. "Dad told me then that something was happening, that the geese weren't coming south the way they used to."

Why not? Partly because of changing agricultural practices, but also as a result of stress occasioned by increased hunting activity. The geese halted, then remained north of their usual destination because they found what they needed and wanted — they avoided harassment.

Hall is afraid we may also lose our snow and blue goose concentrations. "Cases I personally witnessed when we conducted undercover operations in south Louisiana demonstrate the problem in great detail. I have seen photographs made by individuals engaged in creeping. I saw pictures of a pickup

truck completely filled with geese. There were perhaps several hundred taken by this unethical practice in this one instance," Hall stated.

"Last season, 1983-1984, we received complaints about such activities in southwest Louisiana, in the area between Lake Charles and Lafayette."

Hall consulted with Special Agents Bill Ferguson from Lake Charles, Frank Simms of Lafayette and two Louisiana Department of Wildlife and Fisheries game wardens. They decided to work under cover to infiltrate groups which were creating havoc with the geese.

Agents Simms, Ferguson and Hall, using an old, beat-up truck with a Labrador in the back, and wearing clothes like the poachers they had observed creeping geese, became acquainted with folks in the area.

The first afternoon they watched a couple of creeps taking place and observed a number of violations, but did nothing about it: it was their intention to apprehend as many of the persons involved as possible.

"This gave the outlaws a sense of security about us," Dave explained. "They were well organized to break the laws; they used CB radios, were constantly on the watch for game wardens, and frequently discussed tactics to be used in the event that game agents were spotted. However, they were not so well organized that the same groups would work together on all occasions."

That provided the agents, largely

through the talents of Ferguson and Simms, the opportunity to be accepted as fellow creepers. The undercover lawmen were asked whether they might be game wardens but naturally they denied it, saying they too wanted to avoid being caught.

Dave told us of an incident that occurred during the operation: "We were parked alongside a country road watching a flock coming down a short distance away, but near enough to be shot from the road. A vehicle pulled up and the driver inquired, 'What are you guys up to?' We replied that we were getting ready to shoot the geese. 'No,' he said, 'These are my geese and we're planning to shoot them from the truck.'"

"We asked if he minded if we just stayed and watched. 'Oh no,' he replied, then added, 'you guys aren't game wardens, are you?' We hastily denied that."

About 15 minutes later the creeper returned with four gunners standing in the back of the truck. They drove directly to the spot where the birds were resting and proceeded to unload their shotguns into the startled flock.

The agents then drove up and identified themselves. The creepers were well over the limit, had used unplugged shotguns, shot from the road, and committed any number of other violations. Their total disregard for the law well illustrates this type of "hunting."

As the weekend progressed the federal wardens managed to get in with a larger group that was killing many birds. This band was also well organized and used elaborate tactics to prevent getting caught.

Several persons were assigned to watch for game wardens (ironically the agents were given this task during several creeps). They were told that as soon as shots were fired they were to rush into the field and chase cripples and collect dead geese in order to cover over-limit kills. Creeps of course result in enormous over-limits, especially if the gunners are able to approach close to the flock.

Depending upon the difficulty of approaching the geese — whether there is a nice clean ditch that can be used as cover or if a long crawl on their bellies is necessary to take advantage of the meager concealment provided by flat terrain — four or six shooters do the ground shooting.

Others hiding around the field (as close to the geese as they can get without alarming them) load their guns with buckshot and shoot at the geese flying

over them.

There was yet another group, normally older fellows not up to the exertion of creeping, that was referred to as the "salvage gang." After the creepers had hastily gathered as many birds as they could and had departed, the salvage gang would enter the field with dogs to pick up cripples.

"On one creep in which we joined I told the group that I had killed enough geese in my lifetime but would like to photograph a hunt taking place. Therefore they weren't afraid of me or the camera. So I went along and armed only with my camera," Hall admitted.

Between creeps, as the perpetrators rode around in Simm's vehicle, they discussed ways to elude game wardens.

Standby crews were ready to go into the fields so quickly to recover over-limit birds that the only way arrests could be made was to be in the field with them. Otherwise, in a matter of minutes there would be no way for an agent to determine who killed what.

As long as there were enough people to cover the over-bag the creepers felt safe. In this flat country a vehicle can be seen at a great distance; an agent patrolling in a marked car or in uniform hasn't a chance of making an arrest.

Radio contact made it easy to call up additional help when needed. If a delay could be expected before help arrived, the extra geese were "stashed" where they could be picked up later. No over-limit geese would be in the vehicles during the drive back to town.

"On the second day of our operation we noticed an orange truck parked near a flock of geese. The driver was watching through binoculars, so we assumed he was planning a creep. It soon became apparent that this was not the case, so we approached him," Hall said.

He found that the watcher was a Canadian waterfowl biologist studying family groups on the wintering grounds, as well as nesting habitat. Hall asked what he had discovered.

"Well, I have been here three weeks and I am very discouraged because I cannot watch the geese," the Canadian complained. "I don't believe I have been able to watch a flock for as long as 30 minutes without someone creeping up and shooting into it. I can't believe my eyes; I have never seen anything like this before. The birds never get a chance to rest, to feed or preen, to do the things that geese normally do. The harassment goes on from daybreak until dark, sometimes well after dark."

How detrimental is this highly un-

ethical and illegal shooting? When a group takes 180 geese in a single creep and brags about it — well, draw your own conclusions. But even more serious is what is happening to the species. The geese may replace their numbers in time but they will not reverse a change in behavior.

It is feared that if the birds continue to be constantly harassed and killed, they will start wintering farther north where the habitat is similar to the south Louisiana rice fields. Increasing numbers of blue and snow geese are using north Louisiana, Arkansas and Mississippi rice country. Hunters there are elated about the turn of events and enjoy hunting the birds — over decoys, so far.

Another result of creeping, besides causing birds to change their flight and migration patterns, is that the increased stress makes the birds assemble in huge numbers. From 5,000 to 15,000 geese may gather in one concentration — perhaps because of some "safety in numbers" syndrome.

Because of this, legitimate hunters have almost no chance to decoy geese. And it is causing a financial loss to south Louisiana landowners who lease land specifically for goose hunting. There would be additional opportunities for additional goose leases if creeping could be stopped.

The crippling which takes place during a creep is sickening. How shocking it would be if there were some way to find out how much shot the injured birds are carrying.

Other states have regulations which eliminate creeping. They require that goose hunting take place from blind and over decoys. Shots are permitted outside the blind only when retrieving wounded birds.

"It's my opinion that such regulations would work here, and I recommend that the Department of Wildlife and Fisheries consider such a proposal; it could be tailored to apply specifically to geese," Hall concluded.

Creeping is creating a generation of outdoor outlaws — not hunters. It is sporting and it is unethical. And it jeopardizing the future of goose hunting in Louisiana.

South Louisiana hunters scream loud and long about the short-stopping of the Canada goose.

But what if October comes and the skies are silent — what if there is no goose music?

It could very well happen, because creepers are taking our geese away.

United States Department of the Interior  
FISH AND WILDLIFE SERVICE

POST OFFICE BOX 4306  
103 EAST CYPRESS STREET  
LAFAYETTE, LOUISIANA 70502

April 21, 1986

Mr. Larry Soileau  
Louisiana Department of Wildlife & Fisheries  
Opelousas, Louisiana 70520

Dear Larry,

Recently, you and I spoke regarding the feasibility of imposing a regulatory change that would render the "creeping" of geese an unlawful act.

As you know, this unethical method of hunting geese has become a serious problem. This was recently evidenced by the fact that enforcement agents apprehended a total of 104 hunters who had killed 858 geese. Some hunters killed as many as 35 birds per man, not to mention the untold crippling loss which results from indiscriminate firing into feeding and resting goose flocks. Additionally, a serious problem of hunter trespass has resulted.

For these reasons, I suggest that you incorporate the following regulation into the 1986/87 hunting and fishing pamphlet. This regulation has been carefully worded in order to be specific to the undesirable activity of "creeping" geese. Worded as such, it would not restrict the legitimate traditional methods of goose hunting such as pass shooting or the hunting of geese from temporary or permanent blinds with or without the use of decoys and calls. Additionally, this regulation has been approved by the United State Attorney's Office in Lafayette, Louisiana who will prosecute the majority of such violations.

The proposed regulation has been worded as follows:

It shall be unlawful to creep, stalk, crawl, or otherwise approach, feeding or resting blue, snow, Canada, or white-fronted geese for the purpose of taking such geese or thereafter causing such geese to be taken.

"Take" means to pursue, hunt, shoot, wound, kill, trap, capture, or collect, or attempt to pursue, hunt, shoot, wound, kill, trap, capture, or collect.

Sincerely yours,

W. Frank Simms

### ACTION ALERT

LEGISLATIVE OVERSIGHT COMMITTEE OVERRULES CONSERVATIONISTS -  
REJECTS BAN ON GOOSE CREEPING TO CONSERVE WATERFOWL. FURTHER  
ABUSES MAY BRING MORE SEVERE FEDERAL RESTRICTIONS - LAWSUITS  
FROM ANTI-HUNTERS AND FURTHER DISGRACE TO LOUISIANA

As you may be aware by now, on Tuesday October 21st, 5 members of the Louisiana Legislature's House of Representatives Natural Resources Committee, acting as a subcommittee on oversight according to the Louisiana Administrative Procedures Act, rejected a regulation adopted by the Louisiana Wildlife and Fisheries Commission to conserve our wild goose population by outlawing the practice of creeping geese. The Commission's action was a response to the widespread abuse of the resource by shooters who creep close to a flock of resting geese and then fire into the flock resulting in the killing of far over the limit and the crippling of many more.

Though there is nothing necessarily criminal or unethical about creeping per se, it can be devastating to the geese when the method is abused, not only through overshooting and excessive crippling but also through the constant harassment the flocks are subjected to at a time of year when they need to be feeding and resting up for the long flight to the nesting grounds.

The Wildlife and Fisheries Commission adopted the rule banning goose creeping at its July meeting as a means of curtailing the abuse, for both the protection of the geese and the future of hunting. The rule was requested and supported by sportsmen's groups, wildlife biologists, and state and federal wildlife enforcement officials. No objections to the proposal were registered until the members of the oversight committee rejected the rule.

If you support the Louisiana Wildlife and Fisheries Commission in its effort to protect our goose population from excessive harassment and abuse, contact Governor Edwards and ask his support for the Commission's ban on goose creeping. Send copies of your letter to your state senator and representative.

The members of the oversight committee rejecting the rule were: Donald Thibodeaux, Crowley; Murray Hebert, Epoufay; Fox McKeithen, Columbia; Frank Patti, Belle Chasse; and Harry Benoit, Breaux Bridge. Rep. Chris Ullo was acting chairman and did not vote.

Honorable Edwin W. Edwards,  
Governor of Louisiana  
State Capitol  
Baton Rouge, LA 70804

Yours in conservation,

s/ Wilson J. Thibodeaux  
President

# Outdoors

## Disenchantment is a common hazard

THERE ARE MANY disenchanted sportsmen in Louisiana these days ... not that this is anything new. Disenchantment seems to be an occupational hazard, so to speak, for outdoorsmen and other conservationists. Despite their best intentioned efforts sportsmen are more often than not thwarted by reversals. The outlaws seem to win most of the contests. Meanwhile poachers laugh and laugh.

If you doubt this you should have been in one of several bars in southwest Louisiana last week as the word began to filter down that the game wardens had been foiled again, that the ban on "creeping" geese had been killed by the legislature. The "poor boys" were having a fine time as they downed one beer after another at \$1.25 each. "Bartender, gimme another longneck. Ha, ha, ha!"

In our last column we presented the views of the legislative oversight committee as obtained from one of the committee members. Since that time we have received additional information from persons who were at the meeting as well as taped proceedings of the meeting itself.

TO AVOID misunderstandings, the regulations adopted by the Louisiana Wildlife and fisheries Commission states: "It shall be unlawful to creep, stalk or crawl toward feeding geese for the purpose of taking such geese or thereafter causing such geese to be taken. 'Take' means, in different tenses, the attempt or act of hooking, pursuing, netting, capturing, snaring, trapping, shooting, hunting, wounding or killing by any means or device."

The law empowers the Commission to "fix, approve and adopt seasons, bag limits and possession limits and to establish other rules and regulations for the hunting, taking possession or protection of any species or sex of wild quadrupeds and wild birds."

The language of both the regulation and the authority to pass the rule seems clear enough. The

authority has been used several times in the past in issues which received widespread publicity and it was never questioned until now, ironically by the legislature, the very body which granted the powers to the commission.

HOWEVER, depending on the action that will be taken by the LWFC at its November meeting, the entire matter may be moot for this season inasmuch as the Governor did not reverse the action of the oversight committee despite requests that he do so.

It is imperative that the LWFC challenges the oversight committee. If five persons can negate action by a duly constituted body, action that was taken only after holding public meetings, after discussing the matter with Department biologists and considering what steps to take in an advertised, open public meeting there's something wrong. It has many persons wondering if there is a need for a Commission.

There has been much conjecture among sportsmen as to why the legislature would take sides with the outlaws rather than protect the resource. If the committee members were sincere in questioning the statutory authority of the Commission, why was it not researched then and there? How long does it take to look up the law when you are in the state capital?

IT BECOMES OBVIOUS as one delves into the matter that this is excuse more so than reason. When queried about the reasons behind their action, legislators have taken refuge behind such statements as "It certainly isn't a sporting method to slaughter geese on the ground, no more than shooting a covey of quail on the ground or fish in a barrel."

## Goose 'creeping' shot down by legislature

The Louisiana Wildlife and Fisheries Commission's (LWFC) regulation prohibiting the "creeping" of geese was shot down by five members of the legislature. After extensive public hearings and open meetings which had been well advertised to as to obtain maximum comment, the LWFC adopted a regulation to ban creeping. It was printed in the 1986-87 hunting rules booklet and much publicity was given to the action.

It all went for naught when the legislative oversight committee of the House of Representatives killed the measure on October 21 just weeks before the hunting season was to begin. We have yet to find anyone who had knowledge of the pending meeting other than the legislators, their staff and state employees who were required to be present.

The public was not informed!

Regardless, years of work by sportsmen's groups working with LWFC, biologists and the support of some enforcement officials went for naught. The creeping ban was killed by Representatives Harry Benoit of Breaux Bridge, Murray Hebert of Chauvin, Fox McKeithen of Columbia, Frank Patti of Belle Chasse and Donald Thibodeaux of Crowley. Chris Ulo of Marrero was the acting chairman.

There's something wrong when five persons can undo years of effort supported by the LWFC and the State Department of Wildlife and Fisheries. We are advised that Governor Edwin Edwards can veto the committee's action.

We endeavored to find out the reasons for this action from Donald Thibodeaux who resides very close to the scene of much of this largely illegal activity. This is what we learned:

Lloyd  
Abadie

"The goose is a federally protected bird. The committee felt that if Louisiana was the only state to pass such a law it wasn't fair. The law should be mandated in all other states as well."

"The way it is written, the law leaves much to be desired. It's words like — you can't advance on a goose. What is advancing? You can't leave your house or the camp without advancing on a goose. When a man is walking toward his blind he may be in violation. This would be too much latitude for enforcement officers."

"We also thought that a certain segment of our society would get wiped out — that's the poor people. Now the poor person has a chance to ask the farmer 'can I creep some geese'. There are laws that limit the number of geese that can be taken, laws that are already into place. This resolution almost says that a man has to have a blind to hunt geese."

"A farmer might let a poor boy go out there and creep some geese but he's not going to give him his land for a blind. I think we might be alienating a certain part of our society. All the committee members voted against the rule change. It was passed without objection."

"The first goose I ever killed, I crawled to do it. I got one goose, I was within the limit, I did not slaughter geese. There are a lot of kids especially, coming up that have

no other way to hunt."

"Their big hunt is to get in a pickup truck and ride and try to find geese. Then they go and ask a farmer to go on his land. But under this regulation even the farmers themselves would not be able to shoot geese on their land."

Several months ago (May to be precise) we devoted space in this column to call attention to the practice of creeping geese and more especially, to the violation of game laws to which it leads.

Organized groups of shooters locate a field where geese have assembled by the thousands to feed and rest. By crawling in a canal or behind a levee, etc., they approach within range of the birds on the ground and with plugs removed, fire indiscriminately at the birds.

We pointed out that Blue and Snow Geese are changing their migration and feeding patterns as a result of harassment from creeping and expressed the opinion that we might lose these birds permanently — just as we have lost our Canada Geese.

Facts which formed the basis for this column were obtained while doing research for an article on the subject. This article was published in the September issue of Fins and Feathers magazine which is on the news stands now.

The story describes in detail a goose creep and the arrests which followed. It is appropriate therefore that we tell the outcome of the citations which were issued then.

In August two of the persons arrested appeared before a United States magistrate charged with, among other things, each possessing 16 geese over the limit.

One person, a repeat offender, was fined \$500, handed a six-month suspended sentence, denied hunting privileges for five years and was placed on five years probation. He was also required to perform 30 days of community service.

The other, a first offender (how lucky, perhaps he'll get the message), was fined \$350.00, placed on probation for a year and lost hunting rights for a similar period.

The seriousness of the nefarious practice of

kills, encourages shooting with unplugged guns, result in crippling many birds which escape only to die shortly afterward. It also provides the temptation to sell the numerous birds which have been slaughtered and turn them into cash.

The technique is certainly not sporting, it's unethical and illegal. In our many years of exposure to this method of shooting, geese we have never seen nor heard of a creep that was legal.

That is, unless you consider "we let many cripples get away because we would have been way over the limit" to spell ILLEGALITY in anything but capital letters.

For a detailed description of what takes place on a goose creep we suggest that you obtain a copy of the September "Fins and Feathers" magazine. If the news stand is sold out he can probably obtain more from his distributor.

After learning more about creeping, if you agree that something should be done to put a stop to this brazen poaching, this is what you can do.

Telephone toll free, 1-800-442-2511. That's the Operation Game Thief number. Tell them what's taking place and where. You do not have to identify yourself — no attempt will be made to identify you. You will be assigned a number known only to you in order to make you eligible to claim the reward which is offered.

You can help further by providing the license numbers of the vehicles involved in the creep.

Regardless, you will have helped to put an end to this dastardly practice. Unless we do, we stand to lose our geese forever.

Wouldn't it be strange if an October came and there was no goose music in southwest Louisiana? That could well happen unless creeping is stopped. They are chasing our geese away!

# Goose creeping rule rejected

By MIKE COOK  
Outdoor editor

Last Tuesday evening during a local TV news program the weather man joked with the anchor man about Louisiana's goose creeping/crawling regulations. Creeping might sound funny to them, but it's a matter of serious concern to many sportsmen, conservationists, biologists and enforcement agents — and it hasn't gone unnoticed by anti-hunters.

In some areas it's not uncommon for a group of outlaw hunters to sneak up on a flock of feeding or resting geese, shoot, and kill and wound hundreds of birds. Last season federal agents videotaped seven hunters, with legally plugged guns, firing 21 shots into a flock, 156 birds (131 over the limit) were killed and dozens — possibly hundreds — were injured, many limping off to die elsewhere.

This kind of hunting isn't sport — it's slaughter.

If the TV newsmen knew anything at all about goose creeping they kept it to themselves. It was probably just an incredible coincidence that only a few hours earlier the House Natural Resources Subcommittee on Oversight rejected the creeping/crawling regulations adopted by the Louisiana Wildlife and Fisheries Commission on July 13 and already published in the Louisiana Department of Wildlife and Fisheries 1986-87 hunting regulations brochure.

The subcommittee not only struck down years of effort by conscientious sportsmen and wildlife experts but also effectively prevented the commission from bringing the matter back for another year — probably too late for the 1987-88 season.

The only hope for the regulations this year seems to lie with Gov. Edwin Edwards. He has 10 days from last Tuesday — or until Thursday — to override the rejection of the subcommittee. It could be introduced as a bill in the Legislature in April, however.

The LWFC was reluctant to tackle the issue. After all, sneaking up on geese has been a centuries-old tradition in some parts of Louisiana, and there were predictable problems in enforcing regulations prohibiting it.

But there were even more problems with the creeping/crawling hunting technique. It was a combination of several factors — the tape showing hundreds of geese killed and crippled by creepers, the serious concern of several sportsmen's organizations, biologists and enforcement agents, and the bad publicity Louisiana has received in newspapers from

as far away as Alaska and Colorado — that convinced the commission to accept its responsibility and take action.

"We thought we were doing right when we adopted the regulations, and we still do," Dr. Jack Cappel Jr., subcommittee chairman, said after learning of the subcommittee's rejection.

An audio tape of the subcommittee meeting reveals the staff had technical concerns. Did the LWFC have authority to adopt such regulations? Apparently there was no book available to clear up the "technical" doubt, but the law clearly empowers the commission to "fix, approve and adopt seasons, bag limits and possession limits and to establish other rules and regulations for the hunting, taking, possession, or protection of any species or sex of wild quadrupeds and wild birds."

Joe Herring, assistant secretary of the LDWF, assured the five subcommittee members present that the LWFC had checked with several judges and the U.S. Fish and Wildlife Service before adopting the regulations. He explained that although the new rules would prohibit the creeping or crawling up on geese in

the feeding area, an aggressive move, it would still be legal to shoot them from a blind or other fixed position. A member asked if federal agents could enforce the regulations. Several others wondered about that too. "It could be enforced by both (state and federal agents)," Herring answered.

Several didn't seem to like that.

One said he agreed with the concept of the regulations, but noted, "When you leave the house or the camp you're approaching that goose somewhere . . . All my life that I've hunted that's the only way I knew to hunt . . . I think you're going to have a big, severe problem with the enforcement people to try to determine when that guy is sitting there resting; he's tired, he's not creeping, he's not crawling — he's just sitting."

Later, after telling of an incident involving a friend, he said, "I have a problem with the discretion of enforcement agents."

Rep. Murray Hebert of Chauvin, though sympathetic, said he would probably support a bill in the Legislature but couldn't support the commission regulation.

Rep. Frank Pail of Belle Chasse told Herring, "I think we ought to reject it now, but be prepared to come to the Legislature if you feel you have a good idea . . . where we'll have some input from the public and see who's against it and why . . . I think the concept is good, but I think it's premature."

Rep. Donald Thibodeaux of Crowley said, "You'd be eliminating a way of life, especially for the poor — a person who can't afford a lease or can't go with a guide or whatever . . . I think we'd be hurting a certain segment of our hunters that have had that right in the past."

Herring explained the regulations were intended to hurt only illegal hunters.

Rep. Fox McKeithen of Columbia pointed out that there are laws presently on the books requiring plugs in guns and prohibiting excessive kills and shooting from vehicles.

Rep. Chris Lillo of Marrero acted as chairman in the absence of Clyde Kimball of New Roads. Other committee members participating were Reps. Thibodeaux, Pail, Hebert, McKeithen and Harry Benoit of Breau Bridge.

There was no opposition to Hebert's move to reject the proposed (and published) anti-creeping/crawling regulations.

Another sad day for wildlife.

SUNDAY ADVOCATE

# Doves in; goose creeping out

By MIKE COOK  
Outdoor editor

The Labor Day Weekend is a favorite time of year for thousands of Louisiana sportsmen because it's usually the opening of the dove season.

It's more than an opportunity to pop a lot of caps in trying to fill a 12-bird limit, it's a social event that brings friends together. That it also helps to tune up for the Sept. 19-27 teal season is a bonus.

For the second straight year all three splits of the dove season will be statewide. There are no more North and South Zones, which sometimes meant a group of hunters on one side of a highway could shoot while those on the other side couldn't.

The 70-day dove dates this year are: Sept. 5-13; Oct. 24-Nov. 29, and Dec. 12-Jan. 4. The first two days of each split (Sept. 5-6, Oct. 24-25 and Dec. 12-13) are for afternoon hunting only — noon until sunset. On other days shooting hours are one-half hour before sunrise until sunset.

Joe Herring, assistant secretary of the Office of Wildlife, has scouted and come to the conclusion Louisiana's 1987-88 dove season should be "pretty fair . . . as good as last year when one and a half million doves were harvested . . . of course, opening weekend is always best." Herring said he saw "a good many" doves in North Louisiana, but no large concentrations.

"The nesting was good this year and it looks like we have good population of resident doves, but they're scattered. The guys who really prepare for the opening of the season will have birds — if they're in a good dove area. It takes a few years to establish a dove shooting field in areas with low dove populations," he said.

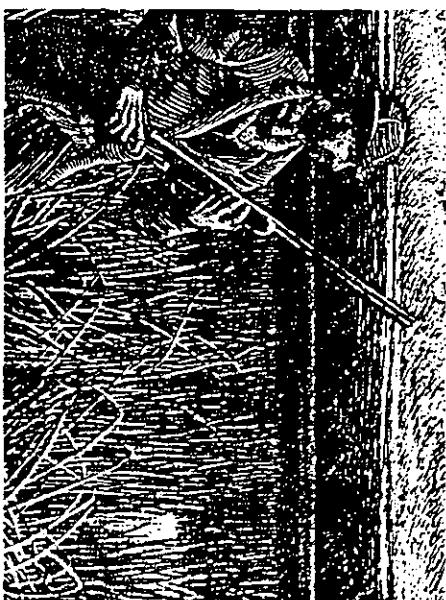

Joe reported that while dove numbers are as good as ever, extensive conversion of woodlands to agriculture (about 100,000 acres a year for several years) in the river parishes caused the birds to scatter. He said weather changes can cause them to disperse even more.

## Goose creepers get stiff penalties

"It's a shame that we honest sportsmen have to suffer because of a few outlaws," moaned a friend who has included at least one goose hunting trip of the creeping kind in his winter itinerary for the past several decades.

"We didn't slaughter geese," he continued. "We just liked to get a bunch of guys in a motor home and go over for a goose hunt. Some of us would stand on top and take pictures while others tried to slip up close enough to take a few geese from a flock."

If he wants to remain honest, he and his friends are going to

have to change their tactics during the 1987-88 season. There's a new anti-geese creeping regulation to replace the one rejected by the House Natural Resources Committee last year. The committee said the Louisiana Wildlife and Fisheries Commission didn't have authority to adopt the regulation, but the attorney general's office ruled differently. The reinstated regulation reads: "It shall be unlawful to approach geese by creeping, crawling or stalking for the purpose of taking geese or thereafter causing geese to be taken."

"Take" is defined as "the attempt or act of hooking, pursuing, netting, capturing, snaring, trapping, shooting, hunting, wounding or killing by any means or device."

Dave Hall is convinced it's practically impossible to sneak up on a flock of resting or feeding geese and shoot into them without killing or crippling more than the legal limit.

Hall is Louisiana's senior federal wildlife enforcement agent. He has apprehended hundreds of wildlife outlaws throughout North America and in a few foreign countries. As an undercover agent he has helped to break up the illegal trade of waterfowl, ivory, alligator hides, spotted cat hides, birds, fish, snakes and just about every other kind of wildlife it's illegal to kill, capture, sell, or buy.

In the marsh Hall has apprehended hunters — some of them wealthy and influential — shooting over the limit, over bait, from motorboats, with unplugged guns, with live decoys and violating every other law in the book. Amazingly, he has become close friends with many of those violators and has converted them to staunch wildlife conservationists. Hall has won numerous state and national awards as an enforcement

officer and as a concerned conservationist.

It was his gall (a requisite for any undercover agent) and his video camera that permitted Hall to record the carnage resulting from creeping and the attitudes of some of the people doing it.

While posing as an outdoor writer (which he is, in his spare time), Hall got in with a group of creepers and taped as dozens of geese were killed or crippled. The violators talked — on camera — freely about their activities. Hall later charged them with various violations.

There was no federal or state law specifically prohibiting goose creeping, but there were other violations — such as killing over the limit, shooting from vehicles and shooting from public roads. There were also violations of the Lacey Act, which forbids transportation of game taken illegally.

Eight Acadia parish residents were originally charged, but one died before the case came to court. The other seven appeared before U.S. Magistrate Mildred Methane in Lafayette last month and pleaded guilty to Lacey Act violations.

George Trumps, Gene Autrey Trumps and Jonnie Lee Richard were sentenced to one year of imprisonment — all but six months suspended for Gene Autrey and all but four months suspended for George Trumps and Richard. Each will also have five years of unsupervised probation during which they must obey all local state and federal laws, "may not hunt," and must cooperate with the U.S. Fish & Wildlife service in hunter education programs — including interviews on video tape.

Wayne Paul Wild, Keith Alan Wild and Paul Everett Wild — all first offenders — received one-year suspended sentences, were placed on two years of supervised probation (during which they can't hunt), were fined \$3,000 each and were ordered to perform 80 hours of community service and to cooperate with the USFWS hunter education program.

The penalty for Charles Ronald Leger was the same as for the Wilds except his fine was only \$500.

"They received punishment that should have a deterrent impact on those who consider creeping and firing into large flocks of geese on the ground," Hall said. "This is the type of action that is very important to educate and change attitudes of those people who regularly violate wildlife laws."

Hall acknowledges goose creeping is a traditional hunting technique in Louisiana but says it is fraught with potential for numerous violations. He said during the past two years two special details headed by federal agents Frank Simms and Bill Ferguson, composed of agents from other states, apprehended 150 subjects for shooting over the limit while creeping. Some 1,500 geese were confiscated.

## Viewing Pros And Cons Of Goose Creeping

By RONNIE PITRE  
Sports Editor

While the Acadia Sportsmen's League feels it will cause a major population movement, the House Natural Resource Committee felt that it would cut out a certain segment of the population ... namely the poor people.

Yes, it's the goose creeping issue again.

Over a week ago the Oversight committee struck down a rule prohibiting goose creeping. The rule, one of several new rules and regulations set in July by the Louisiana Wildlife and Fisheries commission was to go into

effect in 1986-87.

However, when the rule reached the committee it was voted down unanimously by all five of the committee members who voted on the issue. Those members included Donald Thibodeaux, Frank Patti, Harry benoit, Murray Hebert and Fox McKeithen.

Since the rule has been shot down, hunters and hunters' organizations have been asking questions.

The goose creeping law would have prevented any hunter from creeping, stalking or crawling toward feeding or resting geese to shoot them.

It would have been the first ever such law both in

Louisiana as well as the country.

Area state representative Thibodeaux gave three reasons why the committee voted to rescind.

"First of all the goose is a federal bird," Thibodeaux said. "We (Louisiana) would be the only state with such a law. If a law as such was needed then we need to have it in all the states.

"Secondly, it would cut out a certain segment of our hunting population ... namely the poor people. Those people would have to be invited over to a goose hunt or have their own blind before they could hunt geese.

The third reason, "the law is ambiguous. It would

open it up to much to enforcement and too many would get hurt. That would make it tough who really isn't guilty. In a way, the law can't approach any geese for the purpose

Those who were in favor of the original without such a law too many geese would be "tered" by hunters who have no regard to the also say that biologists reports show that it

See VIEWING, Pg. 9A

# CHURCH, from pg. 9A

can also cause a severe movement in the geese population.

"Lake Arthur and Gueydan have the biggest geese population and they are very visible from the roads," said a Sportsman's League spokesman. "They can't rest. They land in a big field and present a major attraction to hunters."

These biologists report that geese which land in one field and sit for 15 or 20 minutes before getting shot at will move.

"It's a traditional instinct for them (geese) to come down and stay in a particular area. But all of this is slowly changing," the ASL spokesman said.

The spokesman also said that a film was presented to the Wildlife and Fisheries Commission was shown were a hunter crept geese and killed 100 to 150 birds.

That's one of the biggest concerns of those in favor of ruling out goose creeping, the slaughtering of the birds by hunters who have not respect for the limit.

"It's difficult for someone to sneak up on a concentration of geese and shoot less than five birds," said one avid goose hunter. "That's the main reason the landowners were in favor of the original goose creeping law."

"They (those opposed to the law) say that poor people don't have a place to hunt," he added. "Well many of those poor people who don't have a place to hunt never bother to stop and ask the landowners if they can hunt."

"They just trespass and that has burned out the landowners," he said.

Thibodeaux said he is definitely opposed to hunters trespassing, but said that if a landowner allows a person to hunt his land he sees nothing wrong with that.

The enforcement against these "slaughters" is indeed a tough job for the wildlife and fishery agents, but it's one that must be done.

Thibodeaux said that he is very much opposed to hunters killing more than their limit through creeping and said that the enforcement agencies will have to work harder to prevent it.

"It's controversial because we've had reports of people who did creep and kill over the limit," Thibodeaux said. "A game warden said that there are hunters who kill over 50 geese on the ground."

"What we ought to do is take that man and lock him up. I am totally against creeping up on geese and slaughtering 100s for them."

"But we already have a law in effect that limits the number of geese killed. The way to overcome the slaughtering is for those people to allow the geese to get up and fly before they start shooting."

"I would even be in favor of a law that allowed the hunters to creep geese then have to scare them up and shoot them in the air."

"But if we take away a basic human right we can just forget about hunting. It will effect the poor person. The rich man will be able to go out and get his lease and his blind and it will become a rich man's sport," Thibodeaux added.

## "ALL YOU NEED TO KNOW"

November 1992

To my fellow Outdoors-people,

I am a most fortunate person. For 26 of the 27 years preceding 1988 I indulged my passion for duck hunting on the great Delta Marsh in Manitoba. I missed 1969 due to the many cultural yelps associated with that loud year. A year of personal and national change. In retrospect, I think, good stuff. But in three decades at Delta I saw change of a different kind. Change akin to aging—the inexorable reduction of an abundance of life. I saw duck populations up and down, up and down. But the long haul trend was relentlessly down.

In 1976 I interviewed many "old timers" for a film project regarding waterfowl. I asked the natural question, "What's happening with the ducks?" An old guide from St. Ambroise, Manitoba, with a glint in his eye and in compelling accent stated, "dey all wen' sou't in plastic bags!" Though his fierce common sense affected me over the years I often thought to myself, would that it were that simple. However, with his incomplete logic still an echo, in 1988 I stopped shooting ducks. For three years I watched the best dog I ever owned grow old. I felt awful. In 1991 I took my dog, my wife and my thoughts and went duck hunting. I loved it but still felt awful. I've been wrestling with my conscience ever since. And asking a lot of questions.

If my "old guide" was charmingly simplistic his counterparts in the duck industry are dangerously complex. Is there a middle ground? Nope. I've come to believe fervently in the simplicity of waterfowl issues, that the awesome complexity in professional management is but camouflage for expediency, politics, fund raising, job security, self importance and stupidity. As an associated public we have been misdirected, under-informed and taken for granted. Unless a great change occurs we will be left holding the empty bag, vilified by our non-sporting brethren, bereft of that which we care so much about. However, there remains opportunity to turn it all around.

First, you have to free yourself from the mind-numbing mountains of reports, indices, data, theory and projections regarding waterfowl. These are the tools of expediency, the ramparts of rationalization. **All you need to know** is for over 60 years waterfowl populations have continuously declined. This is indisputable. It is therefore equally indisputable that our efforts on their behalf can only be judged to have failed. Period. Yet management practices repeatedly demonstrated to be ineffective continue to be applied to an ever increasing problem. Expecting different results from unchanged behavior is one of the accepted definitions of insanity. Governments and private organizations have responded in size rather than substance to the ever more dire waterfowl question. Increasing the scope of flawed management practices has only mirrored the ever growing wetlands and waterfowl crises.

**A**dmitting a problem is the first step in bringing about a real solution. Yet we hear only the noise of complicity. Official pronouncements of optimism, effort and great intentions echo from the halls of "management" through the press, over the duck blinds and into the mists of empty skies. Seduced by the glory of high purpose & big doings' we are blind to the paucity of results. This dynamic of individual good intentions resulting in collective fraud is the very thing our public press and government should protect us from. But the silence is deafening. And tragic. Meanwhile, where are the ducks? **You need to know** is whatever we've done, whatever we're doing, the bottom line keeps sinking.

The clear and simple definition of a problem should be compelling. The truth is there is intrinsically no "duck" problem. It is a people problem. Ducks are fine. It is what people do to, with, about and around them that is the problem. We know all we need to know about waterfowl to allow or cause them to thrive. There is no missing ingredient, no lingering mystery to be solved or secret to be found. We know, and have at our disposal, everything we need to manage waterfowl and wetlands at ecological and recreationally successful levels. This is the most important truth in all of waterfowl management. This reduces the entire equation to one concept, one word: Will. The Will to do what is necessary, to make the hard decisions, to bring about the difficult changes in our behavior, in our private organizations and in our government. Those who should provide this constructive energy are instead hell bent on all the old directions, or worse. So where will this elusive will-power come from? It falls to you and me—we who support, care and consume.

*"Hell bent in all the old directions, or worse....."* It requires only a snapshot of the current response to today's waterfowl problems to understand how frighteningly true this is. Nobody wants to believe we have erred thru 60 years and a billion dollars. Consequently, change comes hard because it is a reflection of the fact that our efforts have been both insufficient and too often misplaced. The shocking truth is that the discrepancy between what we know about waterfowl and what we do about waterfowl adds up to a zero in management effectiveness.

Unquestionably the best example of this is the North American Waterfowl Management Plan, or NAWMP. This has been sold to the public as "the last best chance" for waterfowl. It is the panacea that sportswriters love to prescribe, the sugar-coated bitter pill that Ducks Unlimited (D.U.) and the United States Fish & Wildlife Service (USF&WS) expertly administer to a sporting world sick with hopelessness. **All you need to know** about the NAWMP is this: If, in it's most idealized concept, it were perfectly executed it would not significantly improve the success of waterfowl management on this continent. Based upon the NAWMP stated goal of 100 million ducks in the fall flight the following comparison speaks for itself:

DUCKS UNLIMITED / U.S. FISH & WILDLIFE SERVICE COMBINED RECORD		THE PLAN (NORTH AMERICAN WATERFOWL MANAGEMENT PLAN)	
TOTAL \$ SPENT	\$1,040,000,000	TOTAL \$ TO BE SPENT	\$1,500,000,000
TOTAL ACREAGE	10,000,000	TOTAL NEW ACREAGE	4,900,000
RESULTS ACHIEVED (FALL FLIGHT CREDITED)	5% to 7%, or 3,600,000 birds, or 0.36 birds per acre	RESULTS ANTICIPATED	40,000,000 birds, 8.16 birds per acre

In other words: Based on recent fall flights of 60 million birds the 10 million "conservation" acres of USF&WS & D.U. produce roughly 6% of the fall flight -that's 3.6 million birds or .36 birds per acre. The stated goal of the NAWMP is 100 million birds in the fall flight, to be achieved by adding 4.9 million acres. This represents 8.16 birds per acre, a production increase of 23 times! Reducing this illogic to a simpler narrative—with 10 million acres producing 3.6 million birds it somehow follows that we will procure an additional 4.9 million acres which will then produce 40 million birds! The devil is indeed in the details. The 3.6 million acres targeted by NAWMP for prairie Canada represent only 2.3 % of the pothole country. But 80% of all duck production is associated with this particular geography. Go figure. Meanwhile South Carolina, Texas and Kansas are home to the largest NAWMP projects. This is not even critical habitat, let alone prime breeding habitat. This is the state of current management.

Responsibility for the NAWMP lies with the two respective Federal Government agencies. The Canadian Wildlife Service in Canada and the U.S. Fish and Wildlife Service in the United States. But Ducks Unlimited is the third leg of the stool. D.U. states their "Prairie Care" program is key to the success of the NAWMP on the prairie pothole country of both nations. D.U. is closely associated with other NAWMP mis-activities such as those in the southern U.S. As the Plan continues to evolve it is more a diversion than a solution to waterfowl problems. The NAWMP has no specific strategy to deal with predators, no meaningful approach to critical agricultural relationships, no creative or realistic approach to hunting mortality. In fact the NAWMP is no longer a waterfowl restoration plan. It is a wetlands plan becoming more generic all the time. Bio-diversity & non-game considerations, regional political pressures and contesting agendas have gravely undermined the original premise. In it there is now a little something for everybody. And not so much for ducks.

D.U. and the USF&WS are the premier forces perceived to be functioning on behalf of waterfowl. As such they are accountable both for what has been done in the past and for what needs to be accomplished in the future. The latter is far more important but must be fundamentally influenced by acknowledging the utter failure of the last six decades. To wit:

- ♦ Historically D.U. and the USF&WS have spent 90% of their resources on public lands. But some 90% of waterfowl are raised on small wetlands located on private land, the majority owned by farmers. The fractional contribution (5% to 7%) to the fall flight as a result of these duck management dollars is directly attributable to this fact, and proof of how badly these organizations have failed. Herein is revealed the myth of license and duck stamp sales producing ducks. These revenues have produced a huge bureaucracy called management, but not ducks. In the meantime 80% of prime waterfowl breeding habitat has been impacted by agriculture. **All you need to know** about habitat is that the farmer owns the duck factory. If that isn't reflected in management then there is no management.
- ♦ D.U. and the USF&WS have ignored, deflected or dissembled on the predator issue. Tens of millions of duck eggs are eaten by predators each year. Red fox alone kill an estimated 800,000 mallards each summer, mostly hens. In some areas of the prairie pothole country—the best duck production land in the world—more predators are produced per square mile than ducks. A USF&WS report states, "...rate of nest loss due to predators can be seen to be too high to sustain duck populations even when the habitat conditions are favorable". In most of the prairie region 15% or less of all nests produce a brood and only 25% of the ducklings that hatch survive to join the flocks. Averaging ten eggs to the nest this translates to 2.6 ducks per 100 nest attempts! In North Dakota in

the 1980's the F&WS estimated nest success at only 5% to 7%! Another F&WS report has proclaimed-*"The USF&WS invested millions of dollars for production habitat on the U.S. prairies yet returns are minimal because of the impact of predators"*. While cumulatively over \$100 million is spent annually on ducks there is no state, federal or private program either in place or impending regarding predators. Unbelievable!! Predator populations are so entrenched that creating habitat for duck may be of greatest benefit to the predators. **All you need to know** is: if you can't kill predators, you won't be able to hunt ducks. This by virtue of either recreationally extinct flocks or due to the inescapable conclusion that an animal rights sentiment strong enough to successfully defend predators will ultimately also end duck hunting.

- ♦ Hunting mortality is the yardstick by which we measure both our recreational and management success. The USF&WS is perhaps genetically obliged to fudge on hunting issues. D.U. has either publicly or sotto voce subscribed to the self serving and irresponsible additive/compensatory theory (hunting kills exist within the percentage of duck populations which would have died through natural causes anyway). When ducks are very abundant such politics and shortsighted attitudes can be afforded. But a fall flight under 100 million birds (57 million in 1990, the all time low !) is not abundance. If, as we have so far demonstrated, you can't control the weather, agriculture, predators or natural mortality then hunting is the only available rheostat. The human predator has no magic aura that causes his depredations on flocks to be less impactful than a skunk. If lead shot by ingestion, as reflected by federal steel shot regulations, limits duck populations then it must ballistically as well.

- ◇ From 1960 to 1990 the fall flight dropped from over 100 million to 57 million birds. From 1960 to 1969 87 million birds were harvested by hunters. But from 1980 to 1989 103 million birds were shot.
- ◇ During the drought of 1962 the U.S. kill was 4.2 million birds. The drought of 1980 resulted in a kill of 13.6 million birds.
- ◇ 10% of the hunters kill 90% of the ducks.
- ◇ Since the mid 60's, mallard populations have fallen by one half and pintails by 75%.
- ◇ Severe shooting restrictions (to the point of closure) on wooducks, geese and canvasback have been deemed justifiable and proven to be quickly and significantly successful.

Given these facts the significance of hunting regulations looms large. To protect ducks, to preserve hunting and to continue to justify a "game" oriented conservation ethos hunting regulations must reflect their true relevance to waterfowl population dynamics.

**D**ucks Unlimited is the premier waterfowl organization in the world. As it holds unequalled potential it should receive continued, indeed increased, support. But a sense of reality is prerequisite to accomplishment. Though painful and controversial, it must be seen that the emperor wears no clothes. Over almost 60 years Ducks Unlimited has spent 640 million dollars in the wrong places ultimately producing a tiny fraction of continental duck populations. This organization continues to raise and unwisely spend vast sums while duck populations crash as tragic evidence of D.U.'s past and continuing misadministration. Refusing to confront predators, unwilling to support conservative hunting regulations, unable to work productively in agriculture, unwilling to work in partnership with other conservation organizations and unwilling to communicate honestly to its membership the extent of waterfowl problems and the true nature of its ability to resolve them, D.U. nonetheless postures itself as the once and future savior of waterfowl & wetlands. We must somehow ensure that the past is here not prologue.

At a time of unparalleled crises in waterfowl management D.U. is spending double digit millions on new headquarters. This is entirely capricious and reflects an orientation towards the trappings of grand office rather than the fundamentals of conservation. Bricks, mortar and pomp produce no ducks! D. U. is spending additional millions on a new interpretive center (opposed by virtually every conservation group in Canada & the U.S.) which will not produce one beating waterfowl heart. D.U. has committed millions to a new research arm which is a duplicate effort of the Delta Waterfowl Research Station, Northern Prairie Research Center, Patuxent Research Center and countless colleges and universities with extended biology departments. Never mind that research results will have zero bearing on bird populations. Is it coincidental that D.U. is now borrowing money for the first time in its history? Can interest expense somehow be construed as helping ducks? Only if banks buy wetlands. Though incredibly painful to admit D.U. has unfortunately done little for ducks. **All you need to know** is: \$640,000,000 later we have less than half the ducks we started with and virtually none of their breeding grounds. It's a fact.

Whose fault is all this anyway? The Outdoor and Sporting Press deserve particular contempt and criticism. And, along with program administrators, politicians, scientists and field people, it is yours and mine. We have given our money without oversight or opinion. We have bought licenses and duck stamps without real knowledge of how the dollars were used or vision for the results. We've been foolishly trusting, grossly complacent, oddly silent. The press has been compliant and cowardly; a revenue-vulnerable estate trained to smooth the waters, defend the status quo and have a good time with the old boys as they "research" their articles. We must remember, however, that in all of duckdom, they are us. We bear the burden and the shame. Given our professed love of the resource, our talk of ethics and veneration of traditions; given the values we claim and the values we so proudly attribute to our sport, we are pathetic.

It's time for a change. Waterfowl management has become a flailing mindless monster as a result of mistakes big for good. Instead of continually feeding this beast we must effect a revolution so that our actions become driven by what we know, as opposed to what will sell. Our responses must be shaped by the simple needs of the resource and be reflective of the stark realities and powerful needs of those who own the habitat.

The charade of private dollars solving duck problems must end. The future of waterfowl is on the farms of North America. Within this agricultural universe are black holes of economic and cultural forces that are hopelessly beyond any one or a dozen private charities. As the component parts of civilization bear down upon the viability of wild things even the USF&WS cannot be David to this Goliath. We must effect a revolution of thought, intent and execution. If wisdom is simply calling things by their right name we must become simply wise. We have not been so to date. We must become honest about our failures, selfless in structuring solutions and combine courage and energy in implementing them.

**B**eyond the relatively few of us who like being cold, wet, sleepless and dog-poor why is it so damn important to manage waterfowl at recreationally viable levels? Why, beyond saving wetlands that recharge groundwater, filter pollutants, minimize salinity, deflect erosion and represent critical links in the ecological chain of life are these ducks and swamps so important? Because they are not only unique biologically, ecologically and aesthetically they are unique associatively. Waterfowl and wetland husbandry has become, to a large extent, the popular standard by which conservation measures are judged. It is certain that conservation in part lives or dies with the waterfowl resource. The linkage is undeniable, a domino effect inescapable.

The future of waterfowl management is the future of conservation in this country. This special interest is foundation, bulwark and heartbeat of the continued existence of a game management ethos in North America. Yet it is upon the fruitless tree of waterfowl management that the anti-hunting flock will finally come to roost. The stakes here are incredibly high. Whether you hunt with gun, bow or camera; whether you fish or birdwatch; hunt elk, prairie dogs, ginseng or a spiritual connection to the elements from which we spring, you have a stake in waterfowl issues. Economies related to waterfowl range all across the spectrum of American industry and enterprise. In that the fragility of wetlands and waterfowl is linked to our society there is a significant threat to a substantial portion of our very culture. The ascendancy of non-game management must be seen as the failure to maintain even a semblance of nature's balance in man's world.

*All you need to know is:*

*We know, and have at our disposal, everything we need to manage waterfowl and wetlands at ecologically and recreationally successful levels. This is the most important truth in all of waterfowl management. This reduces the entire equation to one concept, one word:*

**Will**

The Will to prevail, to have wetlands and waterfowl manifest an improvement in human relationship to the land, must be of a strength previously unrealized. This can only come about as the result of a unifying force. This force must flow from the understanding that success is indeed within our grasp, and not over fifteen year time period as in the NAWMP. Goals that have eluded the waterfowl community for so long can be achieved in relatively brief measure. But only through a legislative strategy. Imagine land use on prairies today if \$1,000,000,000 had been dedicated to promoting a federal legislative agenda. An agenda that would preserve small wetlands by creating a related benefit to private farm enterprise. An agenda that would protect and propagate wildfowl and their related ecology as a function of broad-based conservation. An agenda to balance predators (human too) for the benefit of all forms of wildlife, including the predators themselves. Substantively this is conservation. It is not a hard sell. It has simply not been done.

Given the terrific response waterfowl are capable of imagine witnessing the miracle of the rebirth of the prairie in very few years, given the right conditions. These conditions can be caused to happen by government as a fraction of its economic interaction with the forces that limit waterfowl and their environs. Remember, the farmer owns the duck factory and government, through subsidy and regulation, controls the farmer. We can compete with a hungry world. We cannot compete with farm subsidy programs that over North America amount to fifty billion dollars annually! But we can prevail with strong common sense, pen & paper and a vision based upon the mutual benefit of an improved environment. **All you need to know** is: with the stroke of a pen legislation can accomplish what 60 years and \$1,040,000,000 has not, cannot and will not. The pen mightier than the sword, and far more powerful than all the unleveraged foolish dollars in the world.

The Will to persevere and prevail must come from every individual who cares or is in any way related to the resource. This Will must come, in part, from the threat of loss. Ducks Unlimited must be forced to confront this reality through the noisy dissatisfaction of its constituency. The National Rifle Association must understand that the single greatest threat to firearms rights is the failure of game management. These two organizations must bring to bear their respective strengths to initiate a unified conservation community. Every game, fish, outdoor and conservation organization must join together and participate. Every club, society, related business and individual must help to cause this to happen. A purposeful engine of conservation must be fueled by the mistakes of our past, fear for the future and certain knowledge that achievement is but a matter of will. There need be no sacrifice associated with this. No group or organization must surrender its autonomy. No jobs lost, no glory wrested away, no influence surrendered. It is but a shift in emphasis, a growth in ability, a willingness to pool constituent resources. That this has not occurred to date is equal in error to spending sixty years and one billion dollars where the ducks aren't. It is equal in foolishness and small thinking to the total lack of any predator program. It is as unjust as an ever loyal public being misled and endlessly taken for granted.

We can no longer afford to provide support without absolute certainty that the recipients meet this single criteria: to leverage our Will and to alchemize our support into something larger than individual organizations going their own way. I call upon Ducks Unlimited, the National Rifle Association, The Wildlife Legislative Fund, The Isaak Walton League, The Delta Waterfowl Foundation, Audubon, Nature Conservancy, state Waterfowl Associations, Grouse, Elk and Turkey societies, muzzleloaders, bowhunters and fishermen- any who receive public support on behalf of wildlife and lands- to pool their resources and legislatively become larger than the sum of their individual parts.

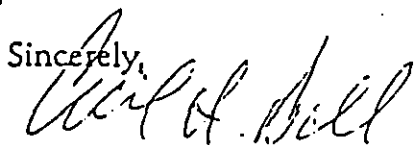

The visions of Aldo Leopold and H. Albert Hochbaum must be the measure our own qualifications and expectations. Their visions and dreams must become our results. The wherewithal to secure a habitat base for all our wildlife, to have waterfowl virtually unlimited and to command the wise use of all our natural resources exists in the desires of millions of sportsmen and conservationists who have repeatedly revealed the depth of their commitment through the generosity of their support. **All you need to**

**know** is: We can no longer be isolated by organization, wildlife species or geography. We can no longer afford to not leverage our collective Will.

Hochbaum wrote of ducks "...it is their destiny to ride the wind." My fear of a tragic destiny, that I might know the empty wind, causes me to write this letter. I have a terrible anger that what I perceive as truth has not been articulated earlier by one of the many more qualified than I. I rage over what has been done so foolishly and what has not been done at all. I damn those who perpetuate excuses, jealousies and defensive attitudes. Perhaps the unifying force necessary to bring about massive change lies in a mutual anger that I suspect many, if not all, outdoors-people share.

It is now that we must contribute more than ever before. Time, money and effort. Join Ducks Unlimited, Delta Waterfowl Foundation, the NRA and any or all other conservation groups. Financial support is crucial but GIVE THEM YOUR ANGER as well! Make your opinions known wherever, whenever and however possible. Demand intelligent responses. Make certain you are no longer a passive participant. Accept no longer the bureaucracy, the excuses, the empire building. Get in the trenches. Let us create and bring to bear a united force for conservation. In an unbelievably short time we can reap the winds of change. Winds of bounty, full of the noise of wild things.

Sincerely,

Cecil H. Bell, P.O. Box 7, Crystal Bay, Minn.

**TITLE 76****Wildlife and Fisheries****Part V. Wild Quadrupeds and Wild Birds****Chapter 3. Wild Birds****307. Goose Creeping**

It shall be unlawful to approach geese by creeping, crawling, or stalking for the purpose of taking geese or thereafter causing geese to be taken. "Take" means, in its different tenses, the attempt or act of hooking, pursuing, netting, capturing, snaring, trapping, shooting, hunting, wounding, or killing by any means or devise.

# Calcasieu Rod And Gun Club

P. O. Box 6524  
LAKE CHARLES, LOUISIANA

June 2, 1993

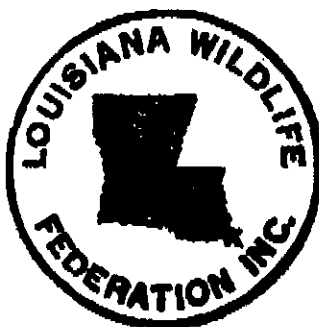

Chairman, Louisiana Wildlife & Fisheries Comm.  
P. O. Box 98000  
Baton Rouge, LA 70898-9000

Dear Mr. Chairman :

The Calcasieu Rod & Gun Club supports the objectives of the  
" Goose Creeping " law which was enacted a few years ago. We  
are in favor of regulations which protect and preserve all of  
our fish and wildlife resources.

Yours in Conservation,

Paul Yakupzack  
President

RULE

Department of Wildlife and Fisheries  
Wildlife and Fisheries Commission

The Louisiana Wildlife and Fisheries Commission does hereby amend the joint Louisiana/Texas Toledo Bend and Caddo Lake Sportfishing Reciprocal Agreement.

Title 76

Wildlife and Fisheries

Part VII. Fish and Other Aquatic Life

Chapter 1. Freshwater Sport and Commercial Fishing

Section 110. Toledo Bend Reciprocal Agreement

The daily creel limit, (daily take), for black bass (Micropterus spp.) is set at eight fish and the minimum total length is set at 14 inches in Toledo Bend Reservoir. The possession limit shall be the same as the daily take on water and twice the daily take off water.

AUTHORITY NOTE: Promulgated in accordance with R.S. 56:6 (25)(a), 325(c), 326.3, 673.

HISTORICAL NOTE: Promulgated by the Department of Wildlife and Fisheries, Wildlife and Fisheries Commission LR 14:548 (August 1988), Amended LR 17:278 (March 1991), Amended LR 17:1123 (November 1991), Amended LR 19: .

Bert H. Jones

Chairman

RULE

Department of Wildlife and Fisheries  
Wildlife and Fisheries Commission

The Louisiana Wildlife and Fisheries Commission hereby adopts the following rule on black bass (Micropterus spp.) in Caddo Lake located in Caddo Parish, Louisiana.

Title 76

Wildlife and Fisheries

Part VII. Fish and Other Aquatic Life

Chapter 1. Freshwater Sport and Commercial Fishing

Section 167. Black Bass Regulations, Caddo Lake

Harvest regulations for black bass (Micropterus spp.) on Caddo Lake located in Caddo Parish, Louisiana are as follows:

Size limit: 14 inch-17 inch slot

Daily take: 10 fish of which no more than 4 fish  
may exceed 17 inches maximum total  
length.

Possession limit: On Water - Same as daily take.

Off Water - Twice the daily take.

A 14-17 inch slot limit means that it is illegal to keep or possess a black bass whose maximum total length is between 14 inches and 17 inches, both measurements inclusive.

AUTHORITY NOTE: Promulgated in accordance with R.S. 56:6  
(25)(a), 325 (C), 326.3.

HISTORICAL NOTE: Promulgated by the Department of Wildlife  
and Fisheries, Wildlife and Fisheries Commission, L.R. 19:

## HISTORY OF THE LOUISIANA SPRING INSHORE SHRIMP MANAGEMENT PROGRAM

The following is a brief history of the development of the shrimp management program and the bases for using the 100 count per pound criteria.

In the 1930's and 1940's scientists debated how to manage the Louisiana shrimp fishery (Lindner 1936 and Gunter 1942). Information necessary to answer many of the questions about shrimp population dynamics was not available and therefore specific management recommendations could not be made.

In the 1960's with the support of the Louisiana shrimp industry, the Department of Wildlife and Fisheries began a series of research projects designed to collect biological and associated hydrological information for the commercially and recreationally important species of shrimp in Louisiana. Information from these and subsequent research and monitoring projects in the 1970's, 1980's and 1990's provides the information the Department currently uses to make management recommendations for Louisiana's shrimp resources.

Since the late 1960's the Department has used the 100 count (whole shrimp per pound) criteria as the basis of its recommendation on when to open the spring inshore shrimp season. This criteria was first published in a report by Drs. T.B. Ford and L.S. St. Amant titled "Management Guidelines for Predicting Brown Shrimp, *Penaeus aztecus*, Production in Louisiana" and reinforced by Gaidry and White's 1973 publication "Investigations of Commercially Important Penaeid Shrimp in Louisiana Estuaries". Gaidry and White (1973) reported "Prior to the enactment of the present program, unrestrained fishing effort during late April and early May of the late 1950's in quest of the spring white shrimp found in the inland waters destroyed the juvenile brown population in its infancy." The restraint later placed on this early trawling effort provided the necessary time for the newly recruited crop to grow to commercial size. ....Criteria used to determine the opening are based primarily on projected growth rates. The ultimate goal is to have a majority of the standing brown shrimp crop of commercial size (100 whole shrimp to a pound)".

(The 100 count size was selected by Ford and St. Amant and Gaidry and White after consultations with the Louisiana shrimp industry and understanding that the Louisiana shrimp fleet was predominately a small boat fleet and that brown shrimp larger than 100 count were beginning their emigration offshore. This meant that if a target size significantly larger than 100 count were selected many of the shrimp would have moved offshore and out of reach of the majority of the Louisiana fishermen. While the shrimp

processing industry in Louisiana has changed somewhat and there is only one shrimp canner left in the state, the principle demand from the processing sector of the industry which has changed from a canned product to block frozen peeled shrimp, is still for a relatively small brown shrimp. A recent study (Baron-Mounce, 1991) found that in 1989 over 81% of the commercial shrimp boats in Louisiana were 30 ft. and less in length. This indicates that the Louisiana shrimp fishery is still predominately an inshore fishery.)

The setting of the shrimp seasons in Louisiana both inshore and offshore waters has at times been a controversial issue. Attached are excerpts from the Louisiana revised statues dealing with the setting of the shrimp seasons. Two milestones are Act 452 passed in 1962 that gave the Commission authority to set the shrimp seasons within a legislatively established framework and Acts 893 and 983 passed in 1988 which deleted the statutory shrimp season dates and gave the Commission the authority to set shrimp seasons based on biological and technical data.

In an effort to aid the Commission in setting the season dates, the Department has provided technical data on shrimp population dynamics since the early 1960's. In addition to the biological information provided by the Department, the Commission has also considered sociological and economic information from the shrimp industry and other interested parties through its public hearing process. Based on the information obtained through the public hearing process the Commission has periodically set the shrimp season dates at times other than those specific dates recommended by the Department's biological data.

From 1984-1987 the Commission deviated from the Department's recommendation only once. In 1984 the Department had recommended the season open in Zone 2 on May 25 and in Zones 1 and 3 on June 4, the Commission at that time was bound by law to open the season no later than May 25 and therefore voted to open all Zones on May 25.

In 1988 the Commission reconsidered the opening date for the spring inshore season in Zone 1 and 3 at the request of the Department. The season had been scheduled to open statewide on May 16, 1988. Additional data from the sampling program indicated an influx of new recruits in Zones 1 and 3 after the date had been set. Based on this information the Commission changed the opening date in those zones to May 25. From 1988 to present the Commission has authorized the Department Secretary to change their established opening date if information indicates such a change would be in the best interest of the state and the resource. At no time has the Commission set an opening date for the inshore shrimp season that differs by more than 7 days from that recommended by the Department.

### Shrimp Seasons - Legislative History

- 1910-Act 245. Established a closed season from June 1-July 14.
- 1912-Act 168. Set 2 closed shrimp seasons, Dec. 1 - Feb. 1 and June 1 - July 1.
- 1914-Act 59. Set 2 closed shrimp seasons, Dec. 1 - Feb. 15 and June 1 - July 15.
- 1924-Act 140. Specifies 2 closed seasons, Dec. 1 - March 1 and June 15 - August 15.
- 1926-Act 103. Closed season, all waters, June 15-Aug. 15. Inside closed seasons Dec. 1-March 15 and June 15-Aug. 15.
- 1932-Act 50. Established 2 closed seasons, March 1 - April 15th and June 10th - August 10th.
- 1940-Act 10. Establishes 2 closed seasons, March 1 - April 15 and June 10 - August 10.
- 1942-Act 143. Sets 2 closed seasons for inside waters, March 16th - May 15th and June 26 - August 15.
- 1946-Act 78. Establishes a closed season for inside waters of December 15 - March 15 and a closed season for inside and outside waters of June 10 - the second Monday in August of each year.
- 1958-Act 53. Established 2 closed seasons in inside waters, December 21 - April 30 and July 1 to the third Monday in August of each year.
- 1962-Act 452. Establishes a spring open season in inside waters, opening no earlier than May 1 and no later than May 15 at the discretion of the Wildlife and Fisheries Commission and extend for a 60 day period. Establishes a fall open

season in inside waters from the 3rd Monday in August - December 21. No closed season in outside waters.

- 1966-Act 54. The spring season commences not earlier than May 1 nor later than May 25 at the discretion of the Commission and extends for a period of not less than 50 nor more than 60 consecutive days thereafter.
- 1969-Act 60. The Commission is to fix no less than 2 open seasons for all inside waters. One of these seasons is to commence not later than May 25 and remain open a minimum of 50 days or until technical data indicates a need for closure to protect the forthcoming white shrimp, and the other season is to begin on the third Monday in August and remain open until December 21. No open season is to begin on a Sunday.
- 1984-Act 300. The shrimping season in outside waters is closed from January 15 - March 15, allowing for a 15-day leeway on the opening and closing as determined to be appropriate by the Commission. The Commission must give 72-hours notice prior to exercising this 15-day leeway.
- 1984-Act 692. Outside waters may be closed by the Commission for a period not to exceed 60 days, during the period January 15 - March 15 on the west bank of the Mississippi River and from February 15 - April 15 on the east bank of the Mississippi River, allowing for a 15 day leeway on the opening and closing as determined by the best biological data available to the Commission, with 72-hour notice prior to exercising this leeway.
- 1986-Act 570. Provides that the shrimping season in outside waters can be closed by the Commission from January 15 - April 15, for such period of time deemed appropriate by the Commission.
- 1987-Act 576. The Commission retains and can exercise the authority to open or close outside waters to shrimping between January 1 and May 1 each year as it deems appropriate upon inspection

of technical and biological data. The shrimp season is to be closed on January 15 for such a period deemed appropriate by the Commission. Unless biological evidence indicates otherwise, the shrimping season in waters which extend due south of Zone III to the 3 mile limit can be opened by the Commission on or between March 15 - April 1 and the shrimping season in waters which extend due south of Zone I and II to the 3 mile limit may be opened by the Commission on or between April 15 - May 1.

- 1988-Act 893. Deletes statutory shrimp season "dates". Empowers the Commission to retain and exercise the authority to close outside waters by zone each year as it deems appropriate upon inspection of technical and biological data. The Commission is given authority to fix no less than 2 open seasons each year for all inside waters by zone, based on biological and technical data. The Commission must give 72 hour notice prior to opening or closing shrimp season.
- 1988-Act 983. Gives the Wildlife and Fisheries Commission the authority to open and close season in inside and outside waters based on biological and technical data.
- 1989-Act 510. Seasons for outside and inside waters are to be set by the Commission based upon technical and biological data which indicates that marketable shrimp, in sufficient quantities, are available for harvest. The Commission is required to conduct a public hearing prior to determining whether or not to open or close a regular or special season. The Commission is to give at least 3 days notice of such a hearing. At such a hearing, the Commission is to adopt written reasons for its decision which must specify the biological or technical data on which the decision is based and the market standard by which the data is evaluated. The Commission's decision is not effective prior to 72 hours after the decision is made. The closing of outside waters to shrimping is not to be construed as

prohibiting or otherwise affecting trawling  
for finfish or underutilized species.

# OPENING DATES OF BROWN SHRIMP SEASON

1963		May	15	July 15	62 days

GULF COAST STATES  
CRITERIA AND METHODS FOR OPENING  
INSHORE SHRIMP SEASONS

Comparisons of Louisiana inshore shrimp seasons and those of other states is difficult. None of the other states possess the vast inshore marsh systems which are typical of Louisiana. After discussing the processes used by the other gulf states to set inshore seasons, it became quite obvious that there was little shrimping activity in their inshore waters although inshore shrimping has increased significantly in recent years. For this reason there was more interest in controlling territorial seas rather than inshore waters in the other states.

FLORIDA

Currently shrimp seasons are set by Commission rule or statute. Florida has divided the state into five regions each of which have different dates and rules which govern the shrimp industry. The state is currently working on a zone plan which will make the rules and season dates more uniform and less complicated.

ALABAMA

The Alabama inshore shrimp season opening dates are set by the Alabama Department of Conservation and Natural Resources. The Division of Marine Resources makes trawl samples in Mobile Bay and Mississippi Sound to catch juvenile brown shrimp. Based on the data collected the staff projects when the shrimp will average 68 whole shrimp to the pound and presents this data to the Department's Commissioner (Secretary). The Commissioner sets the opening dates based on this recommendation. Although Alabama does not have a Zone system, they usually have a staggered opening based on certain definable sections of Mobile Bay and the Sound.

MISSISSIPPI

The Mississippi inshore shrimp season opening dates are set by the Mississippi Department of Wildlife, Fisheries and Parks Commission. State statute sets the season to open on the first Wednesday in June, however this date can be adjusted either way based on biological and technical data. The Gulf Coast Research Lab samples for post larval shrimp and notifies the Wildlife and Fisheries when significant numbers of post larvae move into the estuary. The Wildlife and Fisheries begins trawl sampling for juvenile shrimp 40 days after the arrival of post larvae. They recommend the opening date based on projections of when 50% of the shrimp will reach 68 count per pound (heads on) or larger.

## TEXAS

The Texas inshore shrimp seasons are set by either statute or regulation. The Texas Parks and Wildlife Department collects resource data and provides this data to the Parks and Wildlife Commission. The Commission uses this data in conjunction with input from a Shrimp Advisory Committee to recommend legislation or regulations which establishes non flexible season dates. Currently their inshore spring season is set by statute to run from May 15 through July 15.

**ALTERNATE METHODS TO SET  
THE SPRING INSHORE SHRIMP SEASON**

**A. Zone Openings (System Used Since 1975)**

1. Fully flexible dates for each zone set by the Wildlife and Fisheries Commission (current system).
2. Flexible dates for each zone set by the Wildlife and Fisheries Commission within a framework set by statute, i.e. opening no later than a certain predetermined date (system used prior to current system).
3. Fixed date for each zone set by statute.

**B. Statewide Openings (System Used Prior To 1975)**

1. Fully flexible dates set by the Wildlife and Fisheries Commission.
2. Flexible dates set by the Wildlife and Fisheries Commission within a framework set by statute.
3. Fixed date set by statute.

**C. Statewide Open Season Year-Round**

**ALTERNATE METHODS TO  
DETERMINE THE OPENING DATE**

- A. Based on a combination of biological and technical data and testimony from any source received at a public hearing (current system).**
- B. Based on biological and technical data.**
  - 1. Data collected from fishery independent sampling program
  - 2. Data collected from fishery dependent sources (landings statistics, etc.).
- C. Based on comments received at a public hearing.**
  - 1. Input from any source.
  - 2. Input from commercial fishermen only.
  - 3. Input from shrimp processing sector only (i.e. processors, brokers, wholesalers, etc.).

FY 91/92 Expenditures

PROJECT

	TOTAL EXPENDITURE FY 91/92	EST. PERCENT SHRIMP RELATED WORK	EST. PERCENT RELATED TO SETTING SPRING INSHORE SEASON OPENING*	EST. EXPENDITURES RELATED TO SETTING SPRING INSHORE SEASON OPENING
5143001 (Research-Conserv)	\$ 305,525	33%	6%	\$ 18,322
5144001 (Marine-Conserv)	1,194,712	33%	6%	71,683
5143002 (Research-Shrimp/Conserv)	17,472	100%	17%	2,970
5144002 (Marine-Shrimp/Conserv)	192,905	100%	17%	32,794
5144416 (Interjurisdictional)	418,286	50%	9%	37,646
		Totals		\$ 163,415

\* Out of a total of 2,286 samples taken in 1992, 393 samples (17%) provided information to set the opening of the spring inshore season.

I move that the Marine Div. in  
~~cooperation~~<sup>in</sup> ~~cooperation~~ w/ the Finance  
section, create an economic  
model to show, from our  
historical catch & price  
data, the net income to  
the shrimp industry of taking  
shrimp @ different sizes.

# LOUISIANA WILDLIFE AND FISHERIES COMMISSION

## AGENDA

BATON ROUGE, LA  
June 3, 1993  
10:00 AM

1. Roll Call
2. Approval of Minutes of May 6, 1993
3. Approval of Minutes of May 18, 1993
4. Aircraft Report - Lee Caubarraux
5. Public Comments - 1993-94 Resident Game Hunting Season Proposals
6. Final Ratification of Black Bass Regulations for Toledo Bend - Caddo Lake - Bennie Fontenot
7. Review of Method for Setting Shrimp Season - Jimmy Jenkins
8. Report on the Status/Activity of Department's Finance Committee - Fred Prejean
9. Collection Attorney's Report - Wynnette Kees
10. Civil Restitution and Class 1 Update - Wynnette Kees
11. Monthly Law Enforcement Report/May - Winton Vidrine
12. District Attorney's Report - Winton Vidrine
13. Secretary's Report to the Commission - Joe Herring
14. Set September 1993 Meeting Date
15. Public Comments

1993 REGULAR LEGISLATIVE SESSION

SENATE BILLS

- |  |   |
|--|---|
| SB 57 Hinton<br>(DEAD)                                   | (c) Requires liability insurance coverage on motor boats, sailboats, watercraft, or vessels fourteen feet or more in length. (Insurance)  |
| SB 63 McPherson<br>(ENROLLED 5/27)                       | (c) Authorizes the Department of Transportation and Development to transfer certain lands in Rapides Parish to the Department of Wildlife and Fisheries. (Natural Resources)  |
| SB 109 Greene<br>(WITHDRAWN)                             | (c) Constitutional amendment to authorize the legislature, by two thirds vote, to appropriate, for any purpose, monies contained in certain dedicated funds. (Finance)  |
| SB 212 Hinton<br>(FINAL PASSAGE 6/01)                    | (c) Requires applicants for a coastal use permit or other Coastal Management Division authorization to own at least fifty-one percent of the subject property. (N.R.)   |
| SB 252 Brinkhaus<br>(DEAD)                               | (c) Establishes fees for 2D and 3D seismic operations paid to the Louisiana Wildlife and Fisheries Commission. (N.R.)   |
| SB 359 Barro<br>(FINAL PASSAGE 5/29)                     | (c) Allows the Department of Wildlife & Fisheries to issue fishing licenses to recognized rehabilitation programs. (N.R.)   |
| SB 384 Landry<br>(DEAD)                                  | (c) Reduces the minimum legal size limit of channel catfish in Lac Des Allemands, Lake Cataouatche, the tributaries which lead from Lake Cataouatche of Lake Salvador, Bayou Des Allemands, and Lake Salvador. (N.R.) |
| SB 385 Landry<br>(DEAD)                                  | (c) Provides for the minimum legal size limit for channel catfish. (N.R.)   |
| SB 407 Hines<br>(FINAL PASSAGE 5/29)                     | (c) Allows fishing in Chicot Lake with yo-yos'. (N.R.)  |
| SB 435 Johnson<br>(Pending - Final passage House Floor)  | (c) Designates the green tree frog as the official state amphibian. (N.R.)  |
| SB 442 Cox<br>(DEAD)                                     | (c) Provides relative to the disposition of certain animals seized. (Agric.)  |
| SB 470 Bankston<br>(DEAD)                                | (c) Development of strategic planning process for each state agency. (Finance)  |
| SB 473 Bankston<br>(Pending - Final Passage House Floor) | (c) Exempts East Feliciana Parish from the provisions of the Louisiana Noncoal Surface Mining Law. (N.R.)   |
| SB 521 Picard<br>(DEAD)                                  | (c) Eliminates fee for alligator skin tags. (N.R.)  |

SB 524 Ewing (DEAD)	(c) Prohibits equipment acquisitions by state agencies repeatedly cited for inventory violation. (S & G)
SB 546 Brinkhaus (DEAD)	(c) Dedicates fifty percent of the excess fees collected from the sale of hunting licenses to the enforcement division of the Department of Wildlife & Fisheries. (N.R.)
SB 552 Brinkhaus (WITHDRAWN 5/06/93)	(c) Decreases the alligator fee. (N.R.)
SB 553 Brinkhaus (WITHDRAWN 5/06/93)	(c) Decreases the alligator tag fee. (N.R.)
SB 567 Bagneris (Pending - Final Passage House Floor)	(c) Prohibits discrimination of persons with disabilities. (S & G)
SB 588 Hainkel Ret. to Cal. 5/30)	(c) Amends the phrase "pollution of streams or rivers" to "pollution of streams, rivers, lakes, bayous or ditches in the public right of way". (E.Q.)
SB 591 Hainkel (DEAD)	(c) Creates the Louisiana Coastal Wetlands Conservation, Restoration and Management Act of 1993. (N.R.)
SB 615 Bagneris (WITHDRAWN 5/03/93)	(c) Authorizes the seizing law enforcement agency to recover expenses for preserving, maintaining, repairing or enhancing the value of the property seized. (Jud."C")
SB 617 Dardenne (DEAD)	(c) Prohibits appropriations to a budget unit in excess of certain appropriations for units which overspend. (Finance)
SB 622 Ewing (DEAD)	(c) Defines "public road" and provides for annual adoption of capital improvement program by parish governing authorities. (THPW)
SB 626 Barro (WITHDRAWN 5/10/93)	(c) Requires a priority program for capital outlay projects. (R&F)
SB 641 Kelly (WITHDRAWN 5/04/93)	(c) Provides relative to the confidentiality of certain undercover operation records of law enforcement. (S & G)
SB 719 Bagneris (WITHDRAWN 5/17/93)	(c) Renames the Seafood Promotion and Marketing Fund to the Seafood Promotion and Marketing Account. (N.R.)
SB 726 Bagneris (FAILED)	(c) Increases the fees charged for various commercial fisherman's licenses. (N.R.)
SB 754 Brinkhaus (WITHDRAWN 5/06/93)	(c) Creates the Louisiana Alligator Advisory Committee and reduces the alligator tag fee. (N.R.)

SB 806 Bankston (DEAD)	(c) Pursuant to the Louisiana Oil Spill Prevention and Response Act, provides for the coordinator's powers and duties, and for selection of commission members.
SB 837 Greene (DEFERRED)	(c) Prohibits the taking of bowfin eggs with nets from January 15th through February 28th of each year. (N.R.)
SB 858 McPherson (Ret. to Cal. 5/29)	(c) Provides that the Department of Wildlife and Fisheries shall have sale authority to control and regulate all aspects of hunting, fishing and boating in all water conservation districts. (N.R.)
SB 868 McPherson (CONFERENCE)	(c) Allows public waterworks districts to perform essential operations at certain facilities located on natural and scenic rivers. (N.R.)
SB 869* McPherson (FAILED)	(c) Increases from sixty to sixty-five years the age whereby residents are exempted from purchasing hunting or fishing licenses and fees. (N.R.)
SB 870 McPherson (FINAL PASSAGE 5/29)	(c) Repeals authority for issuing special permits for fishing tournaments for taking fish otherwise outside the legal limits. (N.R.)
SB 926 Morial (DEAD)	(c) Provides that all shellfish caught within Louisiana waters be landed in Louisiana. (N.R.)
SB 958 Foster (DEAD)	(c) Removes Bayou Penchant from the natural and scenic rivers system. (N.R.)
SB 978 Nunez (DEFERRED)	(c) Provides for a surcharge on certain fees paid into the Seafood Promotion and Marketing Fund. (N.R.)
SB 980 Nunez, etal (DEFERRED)	(c) Renames the Seafood Promotion and Marketing Fund to the Seafood Promotion and Marketing Account. (N.R.)
SB 981 Nunez (DEFERRED)	(c) Increases the fees charged for various commercial fisherman's licenses. (N.R.)
SB 982 Nunez (DEFERRED)	(c) Provides for the use of trawls, purse seines and pompano nets in the waters of Breton and Chandeleur Islands and removes the recreational bag limit exception on certain fish using such items. (N.R.)
SB 983 Nunez (DEFERRED)	(c) Allows legitimate molluscan trade associations to print and distribute molluscan shellfish tags. (N.R.)
SB 984 Nunez (DEFERRED)	(c) Reduces the penalty for an oyster tag violation from class three to class one. (N.R.)

SB 985 Nunez (DEFERRED)	(c) Authorizes legitimate Louisiana oyster harvesters and dealers to distribute their own pre-printed oyster tags. (N.R.)
SB 986 Nunez (DEFERRED)	(c) Provides that the La. Dept. of Wildlife & Fisheries may establish fees for the oyster tags that it distributes. (N.R.)
SB 989 Morial (DEAD)	(c) Allows legitimate molluscan trade associations to print and distribute molluscan shellfish tags. (N.R.)
SB 1020 Sevario (Pending - House Floor)	(c) Creates the budget oversight committee of the Oil Spill Interagency Council.
SB 1032 McPherson (DEAD)	(c) Provides for the collection of alligator hide tag fees and alligator shipping label fees. (N.R.)
SB 1034 McPherson (Ret. to Cal. 5/29)	(c) Expands the Marine Recreational Development Board to include members from various freshwater fishing groups. (N.R.)
SB 1065 Hines (ENROLLED 5/31)	(c) Authorizes the Avoyelles Parish School Board to sell certain lands in Avoyelles Parish to the Department of Wildlife & Fisheries. (N.R.)
SCR 11 Ullo (PASSED)	(c) Provides for special committee to study the problem of underwater obstructions in coastal and marine waters of the state. (N.R.)
SCR 63 Greene (ENROLLED 5/30)	(c) Directs the commissioner of administration and the Dept. of Wildlife and Fisheries to study the feasibility of placing small parcels of state-owned land up for public bid. (N.R.)
SCR 64 Greene (ENROLLED 5/28)	(c) Directs the Dept. of Wildlife and Fisheries to study the feasibility of maximizing deer season to enhance the overall quality of game. (N.R.)
SCR 75 McPherson (DEAD)	(c) Directs the Wildlife & Fisheries Commission to set the wildfowl season at Catahoula Lake to coincide with the same season within the East Zone, and to flood the lake immediately at the end of the first split of the season.
SCR 155 Nunez (ENROLLED 5/17/93)	(c) Directs the Louisiana Wildlife & Fisheries Commission to open the inshore brown shrimp season in Zone 2 by May 20, 1993.
SCR 163 Kelly (ENROLLED 5/24/93)	(c) Requests the department to change the name of the Saline Wildlife Management Area to the Dewey W. "Jakie" Wills Wildlife Management Area.

SCR 172 McPherson  
(Ret. to cal. 5/29;  
(H-Orders 5/31)

(c) Directs the Louisiana Wildlife and Fisheries Commission to study the feasibility of setting a minimum number of days for hunting deer with the aid of dogs in Rapides Parish.

SCR 185 Cain  
(ENROLLED 5/28)

Requests the Louisiana Department of Wildlife & Fisheries to study the feasibility of charging a fee for the taking of fish and game on leased land.

SCR 186 McPherson  
(DEAD)

Directs the Department of Wildlife & Fisheries to study the deer herd population in Kisachie National Forest in order to determine if the deer season could be extended.

SR 20 McPherson  
(ENROLLED 5/10/93)

(c) Approves the Coastal Wetlands Conservation and Restoration Plan. (N.R.)

SR 43 Landry  
(ENROLLED 5/21/93)

(c) Commends Johnnie W. Tarver, Chief of the Fur and Refuge Division of the Department of Wildlife & Fisheries, on his service to the renewable natural resources of the state.

85-86	15,440	82,016	170,525	385,101	604,897	673,008	793,647	1,039,934	1,294,788	1,486,754	1,647,274	1,735,256

The season closure seems to have been predicted with landings within 5% of the total quota. This is about as good as can be expected. The main changes were due to some variations between phone estimates of landings and the final figures given in the dealer reports, and to some reports from some dealers who have not recently reported trout landings, and thus were not contacted for the phone survey.

### BRACKISH WATER AND CUTS DON'T MIX

Sportsmen ready to head for the coastal waters in search of redfish, trout or other fish that frequent brackish water should pack more than their lures. They should also make sure they have a few tetracycline capsules in their tackle box to ward off a bacterial infection that, while rare, has led to amputation in at least one case.

The bacterial infection is known as vibrio and is caused by small organisms found in brackish water when cuts are exposed to the water. Symptoms of the disease include a sudden onset of intense pain, followed by chills and fever. If pain or chills begin, an immediate visit to a hospital emergency room is strongly recommended. Do not wait for fever to set in, as this indicates the infection has progressed farther.

An angler suspecting that he or she may be suffering from vibrio should inform the attending doctor of the circumstances under which the infection was contracted. If the doctor does not know the infection is saltwater related, the patient could be treated for another illness.

The vibrio infection is especially dangerous because gangrene begins in a matter of hours. In one case, a victim of the viral infection waited two days to go to the hospital and gangrene was so bad that one of his arms and part of a shoulder had to be amputated.

There are only six to 12 reported cases of vibrio each year, but fisherman should be especially wary of the disease because they frequently cut or nick their hands or fingers while

-over-

vibrio/add-one

on the water. Those anglers staying in remote areas while fishing coastal waters are the most susceptible to the more advanced symptoms of the infection.

Dr. Temple Williams of Baylor College of Medicine recommends anglers take tetracycline whenever they suffer cuts or abrasions while fishing in an area where medical facilities are not readily available.

Tetracycline is very inexpensive, with one Baton Rouge pharmacy reporting that 30 pills would cost less than \$8. A prescription is required before the drug can be bought, so a visit to your doctor before a coastal fishing trip is necessary. Your doctor also can give you the correct dosage of tetracycline that should be taken if a cut or abrasion is suffered.

The coastal waters of Louisiana offer great fishing and hours of excitement. Don't let a small cut or scrape lead to an emergency room visit and possibly a lengthy hospital stay.

Dear Joe:

I would like to place an item on the Commission's June Agenda:

**REVIEW OF METHOD FOR SETTING "SHRIMP SEASON".**

I would like for the Department to be prepared to discuss, at least, the following items:

- (1) Criteria for opening dates and history of development of this criteria
- (2) Other states' criteria or methods
- (3) Cost of collecting data and time spent to set dates
- (4) Alternate methods to open shrimp season
- (5) Review of HCR 252 and SCR 155

Thank you.

Very truly yours,

  
J. H. Jenkins, Jr.
